### Applications For Navy's NROTC Qualification Test Now Available

Applications for the Navy's twenty-second annual Regular NROTC qualification test are now available according to A. Judson Dillon, counselor, at the Culver Community School. This nationwide examination will be given on Dec. 9, 1967, and all eligible male high school seniors and graduates may apply.

On the basis of this test, personal interviews, medical examinations, and other factors, Mr. Dillon explained, over 1,700 young men will enter the Regular NROTC Program as midshipmen at NROTC units in 52 colleges and universities throughout the nation. Male citizens of the United States who will be at least 17 but not yet 21 on June 30, 1968, and who are now high school seniors or graduates, may be eligible to apply for the test. Those who attain qualifying scores will be interviewed and given medical examinations next January and February.

A successful candidate receives financial aid for four years of college. This includes tuition and educational fees, books, uniforms, and \$50 per month subsistence allowance. After successfully completing baccalaureate degree

requirements and naval training, graduates are commissioned as officers in the U. S. Navy or Marine Corps.

Regular NROTC midshipmen participate in three summer at-sea training periods with various naval units. These periods assist them in learning about the variety of interesting and challenging opportunities available to them as naval or marine corps officers.

Registrations for the test will close Nov. 17, 1967. 1968 NROTC Bulletins containing eligibility requirements and qualifying test applications are available from Mr. Dillon or the U. S. Navy Recruiting Station at South Bend.

### Custom Farm Services To Have Grand Opening Saturday, Sept. 9

Custom Farm Services' new plant at Leiters Ford has recently been completed and their Grand Opening ceremonies will be held Saturday, Sept. 9, from 9:30 a.m. to 3:30 p.m.

This new one-stop shopping center for fertilizers and farm chemicals will serve the Leiters Ford and Culver area with prescription-mixed bulk and bagged fertilizers, custom and rental spreader and applicator service, nitrogen solutions, anhydrous ammonia, pesticides, free soil testing and agronomic assistance.

The CFS plant will be managed by John Goble.

The CFS blend plant is a local fertilizer production facility, capable of storing in bulk 700 tons of high analysis granular fertilizer raw materials. The latest developments in bulk handling and mixing equipment make possible high instantaneous production capability of all grades of mixed fertilizer, plus any prescription fertilizer to meet specific requirements based on soil test.

Automatic bagging equipment is used to maintain an inventory of the most popular grades and bag, on order, any prescription

fertilizer required.

The products of this plant represent the ultimate in dustless, free flowing, granular materials in a chemical form that gives maximum crop response.

To provide farmers assistance in applying fertilizer, CFS has purchased the most up-to-date spreader equipment, heavier and more rugged, designed to cover more fields at greater speeds — up to 12 mile per hour — broadcasting as many as 60 acres in an hour, all at a uniform spread pattern. The new-type spreaders are extremely accurate at high or low rates, handle as easily as lighter, less dependable spreading equipment.

Applicator equipment for nitrogen solution and anhydrous ammonia features modern, accurate metering devices and the latest safety features.

Custom Farm Services, Inc. at Leiters Ford is a division of Tennessee Corporation, one of the nation's most prominent suppliers of agricultural chemical products.

Do they live happily ever after?  
Can there be a sequel to classics?

Not many authors write their own sequels. For the most part our favorite people in fiction remain ageless in the tales where we first met them.

Heidi is different. The little girl who grew up in the Swiss Alps has had fans in all countries since Johanna Spyri wrote about her in 1880. Now a new book, *Heidi Grows Up*, has been written by Johanna Spyri's translator, Charles Tritten. Faithful to the original mood, it takes Heidi off to boarding school and brings her back to her home village and the hut on the mountain. Peter the goat-boy is there, Clara comes to visit from Frankfurt, the Alm-Uncle pursues his familiar ways, and there are new adventures and new friends as Heidi chooses her way of life.

The second Heidi book, part of the classics and fiction line of Whitman Publishing Company of Racine, Wis., is a welcome addition to the bookshelf of any little girl.

Any young reader lucky enough to visit Switzerland can still see the birthplace of Heidi's creator, Frau Spyri, on a green hill beyond Zurich. The author, like the little girl she created, was content to spend a lifetime in a beloved country of snow-capped peaks.

Children embarked upon the adventure of growing up will enjoy the novelty of keeping in touch with a well-known fictional friend. Through the years youngsters everywhere have taken special characters to heart — Hans Brinker, David Copperfield, Huck Finn, Meg and Jo and Beth and Amy and other favorites are so vivid they almost jump from the pages of books.

For Heidi readers a sequel is a happy reunion, and there is promise of another book to follow.

### Double action bars give the REMINGTON MODEL 870 PUMP SHOTGUN its lightning-fast operation

At least once every minute this season, some hunter will be using chain lightning to connect with his bird. And the double action bars on a Remington Model 870 pump shotgun will have paid off again. Double action bars give the 870 its lightning speed and effortless action. Over a million 870 shooters can so testify. And they can tell you some other solid facts: A receiver machined from solid steel. A breech block that locks into the barrel extension. A finish that looks like a million.

### Taken At His Word

A man from a remote section of the country walked into the grocery store at the crossroads and announced to the owner that he had given up drinking.

"So you've finally given up drinking, have you?" asked the proprietor.

"Yes, suh," was the reply. "I ain't touched a drop in four weeks."

"Well, you deserve a lot of credit for that," said the storekeeper.

"That's what I think, too," said the mountain man, "And I was just goin' to ask you if you could trust me for some groceries."

# FUN & FITNESS

by Bonnie Prudden  
Noted physical fitness authority

## Introduction

Bonnie Prudden has won nationwide acclaim for her work in alerting people of all ages to the need for physical fitness.

She is a consultant on physical fitness for Reader's Digest and the Director of the Institute for Physical Fitness, as well as known lecturer, author, television and radio personality. Her report to President Eisenhower on the comparative fitness of American and European children led to the formation of the President's Council on Youth Fitness. In this segment, Bonnie discusses the importance of physical fitness and the relationship between bowling and good body conditioning.

The claim of being physically fit is measured by different standards according to our age. To youth, fitness is calculated by a capacity of unlimited energy within a body capable of performing a variety of physical feats. To the middle aged, it is a trim figure which profiles a supple body. And to senior citizens it is the ability to work and exercise accompanied by a sense of well being.

Regardless of your age, you can attain full fitness, and while doing so, pursue a sport which further offers fun, sociability, and relief from tension.

Over the years I have developed an exercise curriculum which provides for a well rounded body conditioning. At the same time, the exercise curriculum can be identified with the exercising benefits derived from the sport of bowling—the nation's most popular participating sport.

Bowling is wonderful exercise for everyone. It suits teenagers requiring a fun sport packed with excitement and keen competition. It is perfect for housewives threatened by overweight and "childbearing spread." It is a recommended sport for executives shackled to desks who are in a peril of weight gain and grueling tension. Doctors say that if you relieve tension and excess weight, you will avoid such dangers as high blood pressure, ulcers and coronary attack.

Whatever your age or occupation, you require regular exercise to maintain your fitness. But more important than a categorical recommendation of exercise is an evaluation of the exercise itself. How long? When? Where? With whom? And with what equipment?

If you are like most of us, the thought of a strict exercise program can be most discouraging indeed. The discipline imposed by a program of regular exercise can abort our plans before we even start. Rather than trying to live a Spartan existence incorporating an enforced exercise program, why not have fun and recreation while conditioning through sport—the sport of bowling. Bowling trims the figure, stimulates the circulatory and respiratory system and provides an agreeable combination of competition, challenge and relief from tension to make it a body conditioner without an iota of drudgery.

So go bowling, and follow my special exercise curriculum and you'll be feeling slimmer, trimmer and healthier than you have in years.

He will be on duty in Guam for 18 months and his address is Thomas A. Yocom, H. M. 3/U.S.N., Personnel Office, NAVHOSP Guam M.I., c/o F. P. O. San Francisco, Calif. 96630.

It wasn't the liquor that killed old John,  
Nor women that stopped his breath;  
Twas a Volkswagen somebody drove up his leg,  
And tickled old John to death.

### THE CHURCH FOR ALL • ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake, (2) For his children's sake, (3) For the sake of his community and nation, (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

# THE STEEPLEJACK

Look closely . . . in this picture a man is risking his life!

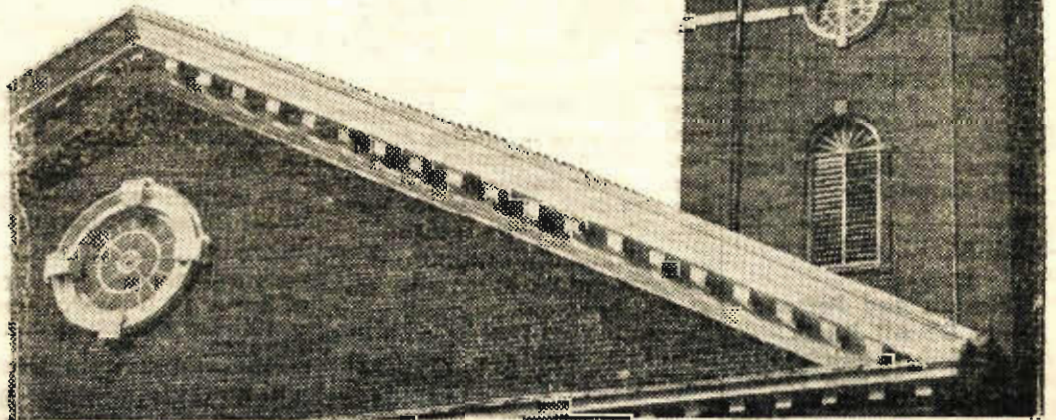

An old and respected trade is his. It had its beginning centuries ago when Christianity first began to express its devotion in unique forms of architecture. How could Christians proclaim constantly their faith in Christ? How could they lift the eyes of others to behold the Lord of Life?

Soon, over gabled village roofs rose gleaming spires. And men who tilled the fields, and men who trod the lanes, rejoiced to behold the symbol of Faith.

Then one day cities replaced the villages . . . skyscrapers dwarfed the spires of God. And so, on the day this picture was taken, ten thousand people passed by and never raised their eyes. Only a few looked upward and thought in mild surprise, "Why, isn't that a man way up there on the steeple?"

Yes. A MAN. One of hundreds of millions whose skill and courage continue to be needed as the Church fulfills its mission.

Maybe your church doesn't have a steeple. But it has a task to challenge your skills . . . your courage.

### Unreliable

One Senator had been making the rounds of his home territory to remind the voters that he'd been doing a right fine job for them in Washington. Following a speech before a women's group he was introduced to a new resident.

"Madam," he smiled, "I certainly hope this constituency will return me."

She shook her head. "I wish you luck, but from the short time I've been in this community I can assure you that these people never return anything!"
