TO OUR SUBSCRIBERS. We have repeatedly called the attention

cf a large number of our readers to the fact that they owe us on subscription; but, seemingly, the most of them think that we can, out of charity, give them the paper and consequently pay no attention to our appeal. They do not realize that we are straining every nerve to keep the paper afloat, when if eachh subscriber would pay promptly we could give them a better paper and meet our bills promptly. We have sucribers right here in Culver, who meet us every day, that are a year or more in arrears, who calmly take the paper out of

the postoffice and smile with evident satisfaction that they can read the news every week, year in and year out, without paying for it. Yet the editor will send his paper to such people in hopes that their conscience will trouble them, and that they

will call and settle. Again we ask you to call and settle, and more especially invite those who live in other localities to send us their mite and thus help us in our efforts

to pay postage on the papers they are reading for nothing.

Hoping to hear from each delinquent very soon, we remain yours truly.

Among the countries producing beet sugar, Germany comes first, with about one-third of the world's crop; then Austria, with about as much, and the same quantity.

Among scientists, says the Golden Penny, the opinion has geen general that a moderate amount of sugar, like a moderate amount of salt, should enter into the dietary of the people of each nation: but it is only when the figures of the consumption of sugar are examined that it is seen that the quantity consumed varies radically, and it is a curious fact that in those stately mansion, which was erected in so many hopes were set, disappeared countries in which maritime spirit-the the midst of spacious grounds in the from his nursery one night. INCIDENTS TERSELY INDIANA TOLD.

Westfield's Principal Business Blocks Burned - Marl Deposits in Lake Maxinkuckee-Electric Railway on Paper-Killed for Theft.

A disastrous fire swept over the busi ness portion of Westfield the other night, beginning about 11:30, and burning steadily until after 2 o'clock in the morning, when it was finally overcome. The conflagration started in the Union block, in which is located the Westfield Bank, G. L. Myers' grocery and F. M. Smith's dry goods store, on the first floor, and various offices and business establishments on the second floor. As soon as possible the fire department went to work, and after three hours' hard work finally got the fire under control, but not until the entire block and the adjoining drug store of W. H. Conklin was a mass of ruins. The origin of the fire is unknown, and the loss is estimated at between \$20,000 and \$25,-000.

Mari Deposit Is Valnable.

Prof. Scovell, who has taken more than 1,000 soundings in Lake Maxinkuckee during the past few weeks, made an investigation of the marl beds at the request of State Geologist Blatchley. He found the deposit at least eighteen feet thick where the water is from eight to fourteen feet deep, but how much thicker he could not tell with the instruments he had at hand. The deposit, so far as could be judged without making a thorough analysis, was of a superior quality, having a large proportion of carbonate of lime, which makes it valuable in the manufacture of cement and as a fertilizer. At greater depths there also was marl, but it contained less carbonate of lime.

DECORATE YOUR HOMES.

Beautiful Representations of Wild Ducks, Pheasants, Quail and Snipe,

Probably at no time in the world's history has as much attention been paid to the interior decoration of homes as at present. No home, no matter how humble, is without its handiwork that helps to beautify the apartments and make the surroundings more cheerful. The taste of the American people has kept pace with the age, and almost every day brings forth something new in the way of a picture, a draping, a piece of furniture or other form of mural decoration. One of the latest of these has been given to the world by the celebrated artist, Muville, in a series of four handsome porcelain game plaques. Not for years has anything as handsome in this line been seen. The subjects represented by these plaques are American wild ducks, American pheasants, American quail and English snipe. They are handsome paintings and are especially designed for hanging on dining room walls, though their richness and beauty entitles them to a place in the parlor of any home. These original plaques have been purchased at a cost of \$50,000 by J. C. Hubinger Bros. Co., manufacturers of the celebrated Elastic Starch, and in order to enable their numerous customers to become possessors of these handsome works of art they have had them reproduced by a special process, in all the rich colors and beauty of the original. They are finished on heavy cardboard, pressed and embossed in the shape of a plaque and trimmed with a heavy band of gold. They measure forty inches in circumference and contain noreading matter or advertisement whatever.

Until Oct. 1 Messrs. J. C. Hubinger Bros. Co. propose to distribute these plaques free to their customers. Every purchaser of three ten-cent packages of Elastic Starch, flatiron brand, manufactured by J. C. Hubinger Bros. Co., is entitled to receive one of these handsome plaques free from their grocer. Old and new customers alike are entitled to the benefits of this offer. These plaques will not be sent through the mail, the only way to obtain them being from your grocer. Every grocery store in the country has Elastic Starch for sale. It is the oldest and best laundry starch on the market and is the most perfect cold process starch ever invented. It is the only starch made by men who thoroughly understand the laundry business, and the only starch that will not injure the finest fabric. It has been the standard for a quarter of a century and as an evidence of how good it is twenty-two million packages were sold last year. Ask your dealer to show you the plaques and tell you about Elastic Starch. Accept no substitute. Bear in mind that this offer holds good a short time only and should be taken advantage of without delay.

The portly servant, who held the door partly open, and shielded his rotund form from the cold blast by shrinking behind it, was endeavoring to prevail upon the poor woman to go away.

"It's no use, ma'am, I assure you. I might give your message to Mr. Stanley, but he wouldn't see you; he has other things to employ his mind. You'd better go away, ma'am, indeed."

"I must see him," said the woman, in a voice rendered sharp by pain. "It is life or death with me now, and if you do not speak to him I must force my way in, in spite of you."

"You are unreasonable," pleaded the servant. "Now what good can you get by seeing him? He won't listen to yor for a moment."

As she stood in the warm hall, brilliantly lighted, a gentleman came out of an inner room-a well-preserved, handsome man, of forty or upwards, with a face which showed at once pride of station and utter scorn of the lowly.

"What is this woman doing here, William, and why does she not come to the servant's door?" he demanded.

"I could not keep her out, Mr. Stanley. She insists upon seeing you."

The Magazine Rifle.

The Springfield rifle has made a splendid record for itself in the past, but the United States magazine rifle of to-day is in all respects the better arm. In the Fall of 1897 the first department competitions were held with the magazine arms, and the total scores made were greater than those reached in the last competition with the Springfield arms. Firings have been conducted at the United States armory in this city for the past three years, and the results show that the United States magazine rifle is more accurate than the Springfields, and especially at ranges greater than 1,000 cause I'm going to craw-fish, for I yards. On the target range reports from the regular army last year showed that, firing at known distances, much higher scores were made than with the Springfield rifle in past years. But in firing on the skirmish line lower scores were made, and this was attributed to the lack of familiar-"She took me to a gipsy tribe, and ity and practice with the magazine very favorably received by the army, The reader will readily see that in a military arm the sights and calibre must be differentiated from the arm itself, for its sights, if not found satisfactory, can be replaced by other sights. When the model 1884 sight was in use it was the only military sight having the wind gauge features. This, we believe, was the Buffington sight, which has since been removed by the powers that be under the allegation that its frailty condemned its. serviceability. On this point a difference of opinion exists among army officers.

Proposed Electric Railway.

Private advices give meager details of a project for the building of an electric railway from Chicago to Goshen via Valparaiso, La Porte, South Bend and Elkhart. Negotiations have been opened by Chicago capitalists for the purchase of the Burns line in Goshen and the franchise for the building of a line between Goshen and Elkhart, which would be a part of the Lake Shore if built.

A man supposed to be Thos. Hawthorne of Chicago, who has been following the fairs, was shot and killed near the fair grounds at Shelbyville by Thomas Cuskaden, a young farmer, whose watch, it is said. Hawthorne and his "pals" had jerked from his pocket. Cuskaden is under arrest, while the officers are looking for Hawthorne's companions.

Ends Life by Hanging.

Thomas Hardy, a member of a prominent family in Lexington township, was found dead, hauging in a corn crib, when relatives returned from church. He had for years prospected for and found gold in small quantities in Saluda creek. He was considered weak-minded. No cause is known for the rash act.

MAY BE CUBA'S PRESIDENT.

Eleuterio Betances, Scientist, Philanthropist, Writer and Patriot.

Eleuterio Betances, the noted savant, Hellenist and oculist of Paris, is being talked of for the presidency of the Cuban republic. Dr. Betances is an ancient enemy of Spain in the West Indies and one of the men who have had most to do with the downfall of Spanish power in those islands. He is a native of Porto Rico, but has long lived in Europe, where his skill as a surgeon and his ability as a man of letters have given him great fame and

fortune. He traveled in Cuba, Hayti and other parts of the group and practiced medicine with great success. He later visited the United States and made a special study of our political, economical and educational institutions. His practice in Paris has made millions of dollars for him, some of which he has drawn from the pockets of even the Spaniards. He has consistently fought Spain with his influence and his wealth, and his name is well known to thousands of Cubans who never saw him. Dr. Betances is 73 years

"Stop! Women,

And Consider the Ail-Important Fact,

That in addressing Mrs. Pinkham you are confiding your private ills to a woman-a woman whose experience in treating woman's diseases is greater than that of any living physician-male or female.

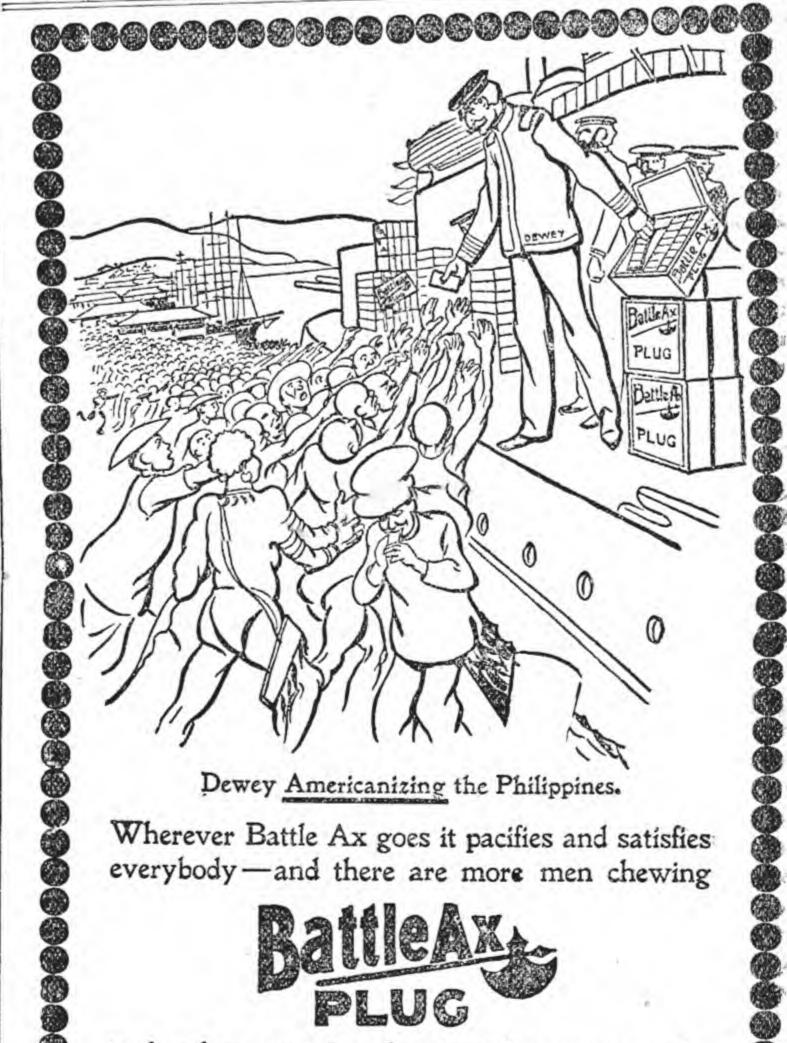

You can talk freely to a womanwhen it is revolting to relate your privote troubles to a man-besides, a man does not understand-simply because he is a man.

Many women suffer in silence and drift along from bad to worse, knowing full well that they ought to have immediate assistance, but a natural modesty impels them to shrink from exposing themselves to the questions and probably examinations of even their family physician. It is unnecessary. Without money or price you can consult a woman, whose knowledge from actual experience is greater than any local physician in the world. The following invitation is freely offered;

accept it in the same spirit: MRS. PINKHAM'S STANDING INVITATION.

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham, at Lynn, Mass. All letters are received, opened, read and answered by women only. A woman can freely talk of herprivate illness to a woman; thus has been established the eternal confidence between Mrs. Pinkham and the women of America which has never been broken. Out of the vast volume of experience which she has to draw from, it is more thanpossible that she has gained the very knowledge that will help your case. She asks nothing in return except your good-will, and her advice has relieved thousands. Surely any woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance.-Lydia E. Pinkham Medicine Co., Lynn, Mass

"The present Mrs. Pinkham's experience in treating female ills is unparalleled, for years she worked side by side with Mrs. Lydia E. Pinkham, and for sometime past has had sole charge of the correspondence department of her great business, treating by letter as many as a hundred thousand ailing women a year."

THE RUSH FOR GOLD.

From the Times, Bluffs, Ill. The rush of gold seekers to the Klondike brings thrilling memories to the "forty-niners" still alive, of the time when they girdled the continent or faced the terrors of the great American desert on the journey to the land of gold. These pioneers tell some experiences which should be heeded by gold seekers of today. Constant exposure and faulty diet killed large numbers, while nearly all the ors were afflicted with disease,

rheumatism. Such a sufferer was Adam V angundy. who now resides at Bluffs, Ill., wherehe has been justice of the peace and was the first president of the board of trustees. "A Forty-niner." In a recent interview he said:

"I had been a sufferer of rheumatism for a number of years and the pain at times was very intense. I tried all the proprietary medicines I could think or hear of, but received no relief.

"I finally placed my case with several physicians and doctored with them for some time, but they failed to do me any good. Finally, with my hopes of relief nearly exhausted I read an article regarding Dr. Williams' Pink Pills for Pale People, which induced me to try them. I was anxious to get rid of the terrible disease and bought two boxes of the pills. I began using them about March, 1897. After I had taken two boxes I was completely cured, and the pain has never returned. I think it is the best medicine I have ever taken, and am willing at any time to sign my name to any testimony setting forth its great merit." (Signed) Adam Vangundy. Students of Finance Discuss Phases of Problem at Omaha.

Students of finance, leading economists, journalists, bankers and business men of prominence, and a scattering representation of politicians and social reformers, were present at the opening of the national currency convention in Omaha, called at the instance and held under the auspices of the National Sound Money League. While the attendance at the opening session was hardly as large as expected, all of the various financial systems were represented by men who show a zealous interest in the objects for which they have met. Conspicuous among the gold-standard advocates present were E. V. Smalley of Minnesota, M. E. Ingalls of Cincinnati, ex-United States Senator Carey of Wyoming, M. L. Crawford of Texas, ex-Comptroller of the Currency James H. Eckels and John P: IFish Of San Francisco. Prominent among the silver men were Congressman Towne of Minnesota and Senator Jones of Arkansas. J. Sterling Morton of Nebraska called the gathering to order in the exposition auditorium.

DID NOT TRUST BANKS.

Prominent Kansas City Woman Is Robbed of \$10,000 in Currency. Mrs. Eli Potter, a prominent woman suffragist, was robbed of \$10,000 by highwaymen in the outskirts of Kansas City, Mo. A few months ago the Potters' residence was destroyed by fire and they received \$10,000 insurance money. Mrs. Potter, who does not trust in banks, sewed the money into the linings of her dress. She was driving in the outskirts of town when a man stepped out from the roadside and grabbed her horse. Another dealt her a stunning blow on the head. When she recovered consciousness she found a sack drawn over her head and the highwaymen were tearing and cutting her skirts. They did not stop in their search until the whole amount of the treasure had been secured.

PANIC IN A CHURCH.

INSANE MAN ROUTS A MISSOURI CONGREGATION.

He Professes Conversion, but After the Church Spnrns Him He Comes Back with a Knife-Fight Between Non-Union Men and Strikers.

Religious Meeting Broken Up, During the progress of Rev. James Vernon's sermon at the Christian Church in Independence, Mo., Frank Kester, a hanger-on about saloons, who is known to the police, arose in the rear of the audience and announced that he wanted to join the church. "I want to join the church; I am converted," yelled the man with glowing red eyes and disheveled hair, in a loud, husky voice. Kester was seized by half a dozen strong hands and escorted to the front door. The pastor had not proceeded very far, however, before the man returned and forced his way down the aisle toward the pulpit. "I am going to take charge of this business myself.' said Kester, threateningly. "You people don't like me, and I am going to clean you out." At this juncture the congregation was on the verge of a panic and women began to scream and faint. Several men grappled with the insane man, who immediately drew a large knife and a pistol and prepared to defend himself. Pandemonium reigned, and amid the shricks of women and children and the threats and curses of Kester, the audi- Philadelphia from London to the effect | ence fled from the church, leaving the intruder in the building. Party to Wild West Show Run Down at a Crossing. A serious and fatal accident occurred upon one of the main thoroughfares in Wichita, Kan., in which two were killed and two others will die. "The south-bound Rock Island passenger collided with a wagon containing fifteen people on their way to the evening performance of the Wild West exhibition of Buffalo Bill. The driver of the wagon was warned, but he refused to heed and the train struck the wagon squarely and threw the occupants of the vehicle forward and ran on. One woman was twisted almost in two at the waist and carried fifty yards. A man had his limbs cut into several pieces and died soon after reaching the hospital. A woman was taken from the pilot of the engine unconscious, but, aside from a few bruises, uninjured.

Pelagic Fishing Must Stop to Save the Supply of Skins.

C. H. Townsend, chief of the division of fisheries. United States fish commission, who has been the official inspector of the seal herd for several years, and a member of the recent Behring Sea committee, has returned from an inspection tour of the seal fishing fields. His observations from year to year conclusively prove that the herd is rapidly diminishing in numbers, declining from 10 to 15 per cent each season. This is the customary falling off since ocean sealing became general. He says that pelagic sealing is still carried on by schooners owned in British Columbia to the exclusion of American vessels. If this practice does not cease, he says the herds will soon be exterminated.

SAN

Exchange Has Risen 100 Per Cent, and Commerce Is Paralyzed-Nine Sailors Drowned in a Collision of Vessels Off Martha's Vineyard.

San Domingo Government Threatened. Serious results come from a widespread commercial panic in San Domingo. Publie discontent has attained such force that the situation of the present Government is critical. The trouble has been accumulating for more than a month, and it is laid at the door of the financial system of the country. Exchange on New York has been gradually rising, and the increase in a month has been more than 100 per cent. This has caused great distress throughout the island. Merchants have found their plans all upset and have been compelled to cancel orders for goods. Cuts in wages have also been made in many instances, and these have caused strikes, which threaten to result in trouble for the Government. Every effort is being made by the banks and merchants to avert disaster, and the Government is being urged to take radical measures to relieve the people.

TRUST BUYS A RAILROAD.

Federal Steel Company Acquires Line in the Coal Regions.

The acquisition of the Lorain and Wheeling Railway by the new Federal Steel Company is classed as one of the plans of this \$200,000,000 corporation, which would go far to complete its system of transportation lines which are to play such an important part in its economies and profits. With the Lorain and Wheeling under its control the Federal could, that the British bark David Morgan, with the other auxiliaries and at small cost for short connections, link its coke ovens with its furnaces and mills over its own tracks and by its own water systems. A rumor that the Federal will ab sorb the Carnegie works was pronounced by those who should possess the best information as "possible, but certainly premature."

SCHOONER BLOWN UP.

Naval Men Escape Miraculously Without Injury.

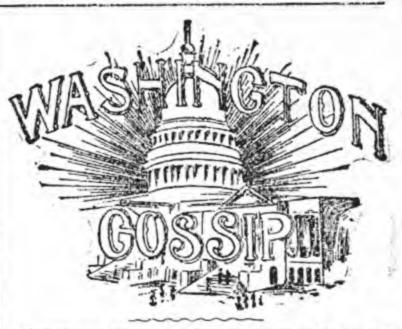

During a test of Cunningham torpedos in Priest's Cove, near New Bedford, Mass., the experiment schooner Freeman was blown up by an explosion of a projectile and sunk. A dozen men were on board of her at the time, but all escaped serious injury. Only two or three received slight scratches. Lieut. Holman, one of the survivors of the battleship Maine disaster, and Lieuts. Oliver and Marshall, the Government board of survey from the Newport torpedo station, were on board the ship and had a miraculous escape. They were standing near the place where the explosion occurred and were in the midst of the crash of wreckage which followed. The men were rescued by a boat. The cause of the explosion is a mystery.

STRIKERS SHOOT TO KILL.

St. Louis Plasterers in a Riot-Nonunion Man Fatally Hurt.

Striking plasterers precipitated a riot at De Hodiamont, at the western limits of St. Louis, in which William Kane, a non-union worker, was fatally wounded and three others seriously hurt. Mounted police responded to a riot call and were met by a fusillade of bullets from the strikers. The police replied with a number of shots and a charge on the crowds, dispersing them and resulting in the arrest of Nat Brown and Joe Lee, who are thought to be the ringleaders. For some time there has been a strike on among the plasterers of that city and vicinity for higher wages, but until this occasion no serious trouble has resulted.

Describes His Dying Sensations. The dead body of Fred Langsdorff, aged 40 years, a bookbinder and spiritualist, was found on the bank of the Kaw at a point near Armourdale, Kan. He had committed suicide after taking a drachm of morphine, a drachm of prussic acid in small quantities, covering a period of four days, and then opening the veins of his arm. During the four days he ate nothing and drank only about a pint of river water. Langsdorff's suicide was a most wonderful show of nerve and determination. An ante-mortem statement of the suicide, found in a little note book beside the dead body, told how he had taken several grains of morphine and sat down under a tree to await death. In the note book is given a minute account of his feelings after swallowing the drug, and his happiness at being so near the "other side," which he calmly dilates upon. When Langsdorff's body was finally found, where it laid lain for hours, everything indicated that he had gone through what his ghastly diary related. No cause for the act is known.

Since the beginning of the war the small telegraph office at the War Department has sent and received 125,000 telegrams, some of which had nearly 2,000 words in them. Besides these messages thousands were delivered by the telegraph companies by messenger, and it is impossible to tell at this time the exact number of telegrams handled. It cost the Government \$5,000 to notify Gens. Miles, Shafter and Merritt of the signing of the protocol which provided for the suspension of hostilities. The toll to Manila is \$2.25 per word, to Porto Rico \$1.84, and Santiago 75 cents. The cablegrams to the generals of the army contained over 1,100 words. Aside from this, Admirals Dewey and Sampson and other naval commanders had to be notified, and altogether it was a rather expensive, though welcome, act on the part of the Government.

Instructions to the peace commission, as finally drafted, are clear and precise, and stronger than at first supposed. The commission is always to proceed on the assumption that the United States has conquered Spain. The United States will demand all the Philippine group, claiming that the entire group is indispensable to the establishment of a military base and the opening up of the commerce of the islands to the whole world. At the beginning the President did not want any of the Philippines outside of Manila bay, but finally became convinced that to secure Manila bay the whole group must fly the American flag. Logical sequences of the possession of the scene of Dewey's great victory and public opinion were the strongest motives which induced the President and his cabinet to demand the whole Philippine group.

Union and Nonunion Men Engage in Battle at Cleveland,

As the result of an attempt of a party of twenty-two non-union men to enter the works of the American Wire Company a Cleveland, where a strike has been on for some time past, a pitched battle took place between the strikers and the non-union workmen. Clubs and stones were freely used, and while no one was seriously injured a number of men were severely bruised or cut. It is alleged that the trouble was started by a non-union man throwing pepper into the eyes of a striker who was endeavoring to prevent the former from entering the works. The strikers closed in, and for a few minutes there was a mass of struggling and fighting men. Upon the appearance of the police, however, the rioters dispersed. Only one arrest was made. The non-union men did not get into the works.

Miners Hopelessly Struggle On. A party of miners who arrived at Vancouver from Fort Wrangel, Alaska, relate a story confirmatory of previous reports of the suffering of prospectors who tried to get into the Klondike by the Ashcroft route. The party is composed of James and Frank Hazara, W. Rough and William Mullin. Their home is at Dolphin Lake, Manitoba. In an interview published in an evening paper Mullin says: "The scenes of distress along the trail are vividly impressed on our minds. We passed fully 100 outfits, representing perhaps sixty men, and many of them were actually starving. The poor fellows had in many cases lost everything-clothing, horses and provisions-and were struggling along in a half-dazed condition, eating gophers, ground hogs, squirrelsin fact, anything they could get. They are a ragged, hungry and desperate crowd of men, with small hopes of reaching their destination. Occasionally a fortunate party on the trail gives them provisions, but none of us had much to spare. All along the trail you could see them lying under the trees and under improvised shelters, trudging helplessly along in the day time, and often lying down at night without a bite to eat. It is simply terrible."

Arrangements for the military occupation of Cuba and Porto Rico are now under consideration, but it is not the intention of the President to send an army to Havana and other ports of Cuba now occupied until the healthy season arrives. The intention is to wait until all danger of the Cuban fever is over and to compose the army of occupation almost entirely of regulars. The idea is to send about 60,000 men to Cuba and to have an army of from 10,000 to 12,000 in Porto Rico. This will require a force somewhat larger than the regular army and the deficiency will be made up by some of debest volunteers. the

Cabinet Decides Upon Policy Regarding Philippines - Instructions for Peace Commissioners Arranged... Iowa and Opegon to Go to Dewey.

Washington special:

The American peace commission will leave for Paris instructed first, to insist on the retention of the island of Luzon; second, to see that special trading privileges for Americans in the other Philippines are accorded on the same basis as Spanish merchants; third, Spain must promise a government in her Philippine possessions that will free the natives from barbarous oppression. No hard and fast rules will be laid down for the commission. Cuba and Porto Rico will not be subjects of negotiation except incidentally. They were disposed of by the armistice, and the future government of Cuba will be established by the United States without reference to Spanish demands or wishes. The Philippine question will only be open to partial negotiation. Manila bay, with the capital of the island, Cavite, and the Corregidor Islands, must remain absolutely as the property of the United States.

Nearly two weeks will elapse before the date for the meeting of the joint commission in Paris, and it may take two weeks more for the commission to arrange preliminaries and get down to business. In that four weeks the situation may change radically. Intervening events may lead the President to demand all the islands in the Philippine group. HUNDREDS DIE IN A HURRICANE.

Terrific Storm and Tidal Wave Sweeps Over the West Indies.

A summary of the work of the hurricane that swept the West India islands includes the following losses: Persons killed, 531; persons rendered homeless, 60,000; buildings destroyed, 12,000; ships wrecked, 3; small vessels stranded and missing, about 15. The hurricane-swept islands are in the Windward group of the Lesser Antilles.

The storm was accompanied by a tidal wave, and the islands of San Lucia, Barbados and Guadeloupe also suffered loss of life and property from the heavy weather. Kingston, the capital of St. Vincent, is totally destroyed. It is estimated that 300 lives were lost on that island, and that the homes of 20,000 people were destroyed. Bodies were buried in trenches. Thousands are starving or being fed at the public expense. Every small house on the Island of St. Vincent is down and many large ones, including churches and public buildings, were razed. Three large ships were blown ashore on the Windward coast, and many smaller vessels are stranded in shoals and on rocks where they were either blown by the hurricane or washed by the tidal wave. An estimate places the number killed on the Island of Barbados at 200. Tremendous rains and the tidal wave caused numerous landslides, in which houses, bridges and cocoa estates were destroyed. The total estimated loss of life on all the islands is 531, and the loss of property aggregates millions.

TO BE MADE A CARDINAL

This Signal Honor Will Be Conferred on Archbishop Ireland.

The announcement that Archbishop Ireland is to be made a cardinal directs attention anew to the gifted and aggressive churchman. The archbishop is thoroughly American. He refused to the passage of a law by the Canadian take orders in France and returned to St. parliament similar to the immigration law Paul to be confirmed.

OUESTIONS AT ISSUE.

American-Canadian Disputes Discuss" ed at Quebec.

Since the assembling of the joint high commission at Quebec, several topics not originally submitted for consideration have been suggested. Some relate to disputes that have afflicted and irritated the two countries for the greater part of the century. The remainder have arisen of recent years in the rivalry of interests and the development of the frontier. Upon most of them the commissioners can easily reach an understanding. That is evident from the conciliatory and liberai spirit shown by all concerned. Matters of detail only will have to be adjusted. The dispositions of both the Canadians and the Americans are to yield to each other wherever it is possible, and not dwell upon unimportant issues. Both are anxious to remove forever all causes of irritation, and both are willing to make sacrifices to accomplish that end.

Iowa and Oregon Are to Be Sent to the Philippines.

The Washington administration is preparing for trouble in the Philippines. The Oregon and Iowa, which are to sail to the Pacific, bound ostensibly for Honolulu, are really going so as to be in position to re-enforce Admiral Dewey should he need help. As it is known that Admiral Dewey's ships can give but little assistance in the suppression of Aguinaldo and his insurgent army, it is evident that the administration fears foreign complications. Germany's intrigues are still being closely watched, with special reference to her seizure of anything in the Philippines that may be unlawfully ceded to her by Spain, such as a coaling station in territory which the peace commission may award in its entirety to America. ment and soon had gained the love of all the soldiers with him. In battle, however, he laid aside the clerical whenever he could help the fighters on the firing line, and did not resume it till the wounded and dying needed his ministrations. Home from the war, he became rector of St. Paul's Cathedral. In 1875 Dr. Ireland was appointed a bishop and assigned to the vicarate of Nebraska, but this assignment was changed and he was made coadjutor bishop of St. Paul. Nine years later he succeeded to the see of St. Paul, and in 1888 he was elevated to the archbishopric.

WALKED SIX HUNDRED MILES. A Long Journey of a Veteran Who Attended Cincinnati Lucampment.

At the Grand Army of the Republic encampment in Cincinnati one of the most interesting figures was Comrade J.

R. Rappe of Marinette, Wis., a veteran of three wars and aged 83, who walked all the way from his Wisconsin home to Cincinnati. Comrade Rappe saw service in the Mexican, Seminole and civil wars, and despite his advanced years reads a newspaper J. A. RAPPE. easily without the aid of glasses. He covered the 600 miles in twenty-eight and a half days. He declares that he never felt better than when he reached Cincinnati, Mr. Rappe was a guest of T. A. Wilkinson of Avondale, with whom he served in the Thirty-second Wisconsin infantry throughout the civil war.

It is impossible to forecast what the commission will do with the fisheries dispute, which has been pending since the beginning of the century; and its satisfactory settlement is vital to the future harmony of the two countries.

The free use of Canadian canals by American ships, which has been demanded by the Chicago Board of Trade and other commercial organizations upon the lakes, cannot be granted by the Dominion Government for reasons of economy.

The extradition treaty now existing will be amended so that officers of the law may convey prisoners from one point of the United States to another through Canadian territory or from one point to another in Canada through the territory of the United States.

This may be an "off" year in politics, but the importance of the elections does not make it appear so. Twenty-eight States elect Governors and State Legislatures, as follows: Rhode Island (last April). Oregon (last June). Alabama (in August), Arkansas (Sept. 5), Vermont (Sept. 6), Maine (Sept. 12), and New York, Pennsylvania, Texas, Michigan, Wisconsin, Massachusetts, New Jersey. Minnesota, Kansas, Tennessee, California. Nebraska, Colorado, Connecticut, Georgia, New Hampshire, South Dakota, South Carolina, North Dakota, Idaho, Wyoming and Nevada on Nov. 8. Besides these Illinois elects a State Treasurer; Ohio, Indiana and Iowa a Secretary of State; Missouri, North Carolina and Florida justices of Court of Appeals or Supreme Court, and Delaware, a Treasurer and an Auditor. The importance of the State elections lies in the fact that Legislatures elect thirty United States Senators. The Legislatures electing are in the following States: New York, Pennsylvania, Ohio, Missouri, Indiana, Texas, Michigan, Wisconsin, Massachusetts, New Jersey, Minnesota, Tennessee, California, Virginia, Maryland, Nebraska, West Virginia, Connecticut, Maine, Utah, Washington, Mississippi, Vermont, Rhode Island, Montana, North Dakota, Florida, Wyoming and Nevada. In some of these States, notably Maryland, Ohio and Rhode Island, the Legislatures have already elected Senators. The control of the next United States Senate depends on the State elections to be held. Again, the last congressional elections before the presidential election of 1900 are to be held this fall. Upon their results depends the composition of the next House of Representatives, which shall determine the future course of the United States relative to the territories acquired by the war, and solve many perplexing questions arising from the war.

SHAFTER MAKES HIS REPORT.

Entire Contents Will Not Be Given to the Public,

Major General Shafter has handed to the adjutant general of the army at Washington his official report of the military operations leading to the capture of Santiago. He deals with the Santiago campaign in the most exhaustive manner. Having prepared his report after all the reports of brigade and division commanders had been made, Gen. Shafter was able to profit by the statements made by these officers. The result is a valuable composite of the minor reports, although a large amount of original and independent material is contained in the statement of the commanding general.

THE PRESIDENT'S DIFFICULTY.

Hard to Secure Suitable Men for the Inquiry Commission.

President McKinley is having trouble in making up the commission to inquire into the treatment of the American soldier during the war. White House officials refuse to tell which of the nine men have accepted or declined, but from other sources it is learned that ex-Secretaries of War Robert T. Lincoln and Daniel S. Lamont, Gen. John B. Gordon and ex-Senator Charles F. Manderson have declined because of ill health or business engagements. Col. James A. Sexton of Chicago, commander-in-chief of the G. A. R., and Daniel C. Gillman of Johns Hopkins University are reported to have accepted.

Historical Souvenirs.

The bullion dealers who purchased the Spanish gold, silver and notes found on the Infanta Maria Teresa, after the battle of July 3, propose to dispose of the whole lot to the public at a premium over the face value, as interesting historical souvenirs. The coins are tarnished by fire and water and the notes are stained.

Fever at Ponce.

Yellow fever has appeared among the troops at Ponce, Porto Rico. There has been one death, and four cases among the troops were officially acknowledged as such a few days ago. A strict censorship was immediately imposed, and the censor has refused to permit any news whatever to be cabled from Ponce.

Antics of the Cortes.

The Spanish Cortes is spending its time in recrimination, which looks as if there might be some delay in appointing Spanish members of the peace commission,

GAGS THE CORTES.

Premier Sagasta's Daring Suppresses Spanish Agitators.

By proroguing the Spanish Cortes in the midst of a heated and violent discussion over the war, Premier Sagasta ended a stormy session of the senate and probably saved his queen and country. Gen. Primo de Rivera and Count Almenas were the leaders of the turmoil, and while it lasted the chamber was a wild scene of uproar and disgraceful disorder. Sagasta, with the decree of the suspension of the session of the Cortes, ascended the tribune. He mounted the rostrum and read a decree proroguing the Cortes, and the law forbids any one speaking after the queen's decree has been read. His pluck saved the country and his queen.

a certain amount of "Murphies" for immediate use. Mr. Kline informed The Packers at the Battle of Santiago de the gentleman that he might spare a few, and then inquired the price, when the buyer replied that "taters" were worth from 25 to 28 cents per bushel, according to quality, but that you could buy all the potatoes you desired in the near future for 15 cents a bushel. Kline took the buyer into the field, where he had a small patch, the rows being 45 yards long by actual measurement, and told the buyer that be would sell him 15 rows for \$15, but after considerable talk concluded to let them go for \$13 even. They then pro ceeded to dig the potatoes and took just 53 bushels from the 15 rows, showing that an acre would have produced over 200 bushels. Who can beat it?

"The Poor Soldiers."

For the past two months the yellow journals all over the country have been howling themselves hoarse over the alleged neglect of the " poor volunteer soldier.' and a great number of citizens throughout the country have been strong in their condemnation of the government, and especially the war depar mant.

During the past ten days a reporter of the HERALD has interviewed a score or more of soldiers, who are at home on furlough, and with but one or two exceptions, they all denounce the infamous attacks of i of these notorious sheets as grossly false and misleading. . One of the boys said:

"To be sure the soldier suffers privations, but the man that goes to the front at his country's call, with patriotism in his heart, does not expect to dine at firstclass hotels or sleep in palace cars while on the road. The s ldier's life varies. S. me days milk and honey flows through the camp, while at other times if a man s ceeds in securing hardtack he considers himself lucky. No country in the world ever did and ever will conduct such a wonderful campaign. In less than four months' preparation war was declared and the in my subjugated. Of course there has been mistakes made, but no sensible -man will think for a minute that the great Remember to call and see 'The philanthropic hearts of McKinley and Alger made any mistakes purposely. This is a country of humanity, and the sold r loves it and will forever revere the memory of the sagacious men at the head of this government during the Spanish-American war." The above is the language (nearly verbatim) used by one of M rshall county's boys who has been down South; consequently it is prima facie evidence that m st of the slanderous attacks are made ony for political buneamb, but which, now that an investigation is to be made relative to these awful wrongs charged, are beginning to fall flat, and already these scurrilous sheets are beginning to hedge.

Cuba were all Heroes ... Their Heroic Efforts in Getting Ammunition and Rations to the Front Saved the Day.

P. E. BUTLER, of pack-train No. 3, writing from Santiago de Cuba, on July 23d, says: "We all had diarrhoea in more or less violent form, and when we landed we had no time to see a doctor, for it was a case of rush and rush night and day to keep the troops supplied with ammunition and rations, but thanks to Chamberlain's Cahe, Cholera and Diarrhœa Remedy, we were able to keep at work and keep our health; in fact, 1 sincerely believe that at one critical time this medicine was the indirect savior of our army, for if the packers had been unable to work there would have been no way of getting supplies to the front. There were no roads that a wagon train could use. My comrades and myself had the good fortune to lay in a supply of this medicine for our pack train before we left Tampa, and I know in four cases it absolutely saved life."

The above letter was written to the manufacturers of this medicine, the Chamberlain Medicine Co., DesMoines, Iowa. For sale at the Calver City Drug Store.
