DEAR FRIENDS:

Sunday, April 21, was a red letter baptisms, this being the largest number ever kaptised here at one time. It was an inspiring sight indeed to see so many people thus publicly confessing Christ and giving up their old lives of superstition. The church was crowded the doors as indeed it is every Sun-Dr. Daum, superintendent of the day. It filled one with delight and gratitude to see the expression of happiness on their faces which was joy within their hearts. On the Sabbath preceding, one very old man Mr. John Vajen and daughters, had walked in a distance of fifteen live in a little village which no missionary has ever visited, and only an occasional helper. The only Christian book they had was the Gospel of Matthew, which they had studied together and were thus led to believe. Their examination was most satisfactory, being clear and distinct and was only another evidence of what the Holy Spirit is A regetta will take place upon doing for this people. On next Sabbath the new wing of the church will be occupied for the first time, thus nearly doubling the seating capacity. It is estimated that the enlarged church will seat eighteen will soon be filled. It has been the aim of the station to build strong church here in up one as a model scheme has been maugurated of returned home and found the woman having bands of Christians every of the church just leaving the Com-Sunday go out into the country and pound from a reception they had Mr. S. Every lake has altered or diminished within the life of a person of middle age. A study of conditions at Maxinkuckee leads to the conclusion that no Indiana lake will outlast it or alter more slowly, if left to the operation of natural forces. Its placid waters cover substantially the same area and sound practically the same depth as when the Indian had his villages on the surrounding ridges and paddled his bark canoe over its rippling surface. It is the most permanent as well as the most beautiful of all Indiana lakes.

BIG MILL IS DESTROYED.

Owners of a Plant at Saltillo, Ind., Failed to Comply with Demand.

E. Hoise & Sons' big flouring mill at Saltillo, Ind., was destroyed by fire the other night. Several days ago the proprietors of the mill found a note in the keyhole, informing them that unless they put a certain amount of money in a sack and left it at a certain cross-road their mill would be burned. One of the firm filled a sack with buggy washers and drove out to the appointed place. The other members of the firm were near, armed with shotguns, and guarded the place most all night, and no one bothered the sack, but in a few minutes after they left the sack disappeared. A few nights afterward the mill was burned to the ground.

FATHER AND SON UNITED.

After Being Separated Six Years Lad is Found.

Walton W. Lipps is back in the home of his father, John W. Lipps, in Chicago, after an absence of six years spent in homes for the friendless, orphanages and other places in which he had been placed by his legal guardians. The father's search for his boy ended at the orphans' home at Berne, Ind. Upon the death of the boy's mother six years ago his relatives, believing that his father was not fit to have the care of him, took the small estate left by Mrs. Lipps into court, and the late Jerome K. Dunlop of Oak Park was appointed executor. The boy Walton was placed in the care of various institutions, and once was sent as far away as Cleveland, Ohio, when his father attempted to get possession of him. E. E. Young of Boston, who had traced down a woman for the settlement of another small property and found her married to Mr. Lipps, was called into the case. Recently he took a power of attorney and went to Berne to learn what he could of the boy. Rev. William Eggley, assistant superintendent, refused to give up the boy and his clothing, and finally Young took the boy and his trunk to the station. He was pursued by the orphanage employes and the townspeople were aroused in the belief that the lad was being kidnaped.

MURDERER COMMITS SUICIDE.

The woman was fearful of vengeance and removed to Frank Viebahan's place, south of town. Appearances indicate that the woman saw Yost approach the house and hooked the screen and locked the door. Yost tore open the screen door and kicked in the door, where the woman confronted him with the 10-months-old child in her arms. He fired with a 38-caliber revolver, the ball entering the child's forehead and emerging at the back of the head; thence tearing a groove through the door. The woman was shot through the fleshy part of the right arm, the bullet passing into the side. Physicians have no hope of her recovery. Yost then went to where his team was secured and deliberately placed the revolver against his right temple and fired. The bullet emerged from the opposite side of his head, Yost dropping without a struggle.

INTENSE HEAT GIVES WAY TO MODERATE TEMPERATURE.

Conditions Are Better-Corn in Iowa. Is Not as Much Hurt as Was Supposed - Cotton Is Much Improved, Though Rain Is Needed.

The general summary of the weekly crop report issued by the Agricultural Department is as follows:

Intense heat prevailed during the greater part of the week throughout the central valleys, but the temperatures during the last three days were more moderate. Good rains have fallen over a large part of the drought area in the Mississippi and upper Missouri valleys, but drought conditions have become more serious in the Ohio valley and Tennessee, where the week has been rainless except. in a few localities. In the Atlantic districts the weather conditions have been generally favorable, except over portions of the Carolinas and Virginia, where rain. is now needed. The conditions were alsofavorable on the Pacific coast.

Recent rains have improved late corna in portions of Nebraska, Kansas, Oklahoma and Missouri, but the early cropwas practically ruined before the rains came. In Iowa the crop has sustained less injury than in the before-mentioned States, and the rainfall has been copious. and well distributed. In the great corn States east of the Mississippi river, except over northern Illinois, drought and excessive heat have continued with disastrous effects upon corn, which is now in a critical condition. In Michigan and generally throughout the middle Atlantic States and New England the corn crop is in fine condition.

Winter wheat harvest is general on the north Pacific coast, and good yields. Harvesting of spring wheat is well advanced over the southern portion of the spring. wheat region, and has begun in the southern Red River valley. Premature ripening has reduced the yield and quality of the crop over the southern portion of the spring wheat region, although the thrashing returns show better yields in Iowa than were anticipated. In North Dakota and northern Minnesota the crop has sustained but little injury from heat.

Oat harvest continues in the more northerly sections, having been delayed by rains in Michigan. Reports of premature ripening continue from the upper-Missouri valley. A light crop is indicated in the middle Atlantic States. The condition of cotton over the great-

er part of the cotton belt is improved, good growth and clean fields being generally reported. In Missouri, Arkansas. Tennessee and central Texas, however; the crop continues to need rain, and shedding and blooming at top in these States are extensively reported.

In the Ohio valley and Tennessee tobacco continues to suffer from drought,. but in Kentucky and Tennessee has withstood the unfavorable conditions well.

The apple crop in the central valleys. has been further injured by drought and heat and a very light crop is indicated in the middle Atlantic States and New England.

Conditions in Western States.

Illinois-Dry and very hot, except in northern section, where good showers helpeda crops considerably; injury to corn considerable, but good rains in three or four days: will still be of great benefit; yield will be considerably below average, especially in southern sections; in the vicinity of Springfield and south, pollen dry and falling before silk; forms; some fields cannot be he ped; haying; done; oat thrashing nearly finished; crop. better than expected; gardens ruined; potatoes rotting in ground except in north; all farmers feeding stock; small streams drying: up and stock water scarce; peaches small

and apples nearly all fallen; stock peas good. Indiana-Hot, dry, sunny weather injured all growing crops; corn suffering much, and prospects for fair yield greatly reduced; in north portion, in districts where local showers fell, corn has good color and promises well, but elsewhere it is in a critical condition, being in silk and tassel; on bottom lands corn is suffering less, and rains would improve it, but on high, clay and sandy soil, or where tassels burned white, rains cannot save it; tobacco grows slowly; most potatoes.

Ohio-Temperature excessive; local showers relieved drought in northeastern and southeastern counties; corn benefited where rain occurred, but injured somewhat by accompanying high winds; in central and southwest corn much damaged by drought; condition critical; oats good; potatoes and gardens poor; tobacco injured; good crop of peaches ripening; winter apples scarce; some dry rot in grapes; pastures drying up.

Michigan-General and ample rains exceedingly beneficial to corn, pastures and latepotatoes, but delayed having and harvest work; corn and sugar beets mostly in fine condition; corn earing; oat harvest well advanced; hay, wheat, rye, peas and barley mostly secured with but little damage; yield of early potatces considerably shortened by previous dry, hot weather.

Wisconsin-Drought, which was confined to southern counties, broken by copious rains; corn, tobacco and potatoes in southern section on upland sandy soil probably a total failure, but elsewhere much improved; all growing crops in central and northern sections in excellent condition; having nearing completion, crop heavy except in drought section, quality excellent; considerable oats, barley and wheat in shock, some thrashing done, yield fair; oats generally light in weight.

Iowa-Drought broken by copious and wellfects; extent of injury to corn crop cannot. yet be estimated; inspection of fields shows. much remaining vitality in tasseling, but earing has been tardy, and deficient in early planted fields; later corn promises better returns, though below normal condition; best promise for crop in northern half of State. and in counties having largest acreage; thrashing returns show out and wheat yield better than anticipated.

South Dakota-Hot; early corn generally considerably damaged, late less injured, and with favorable weather above half-crop of corn is probable; fairly distributed showers. generous in a number of localities, revived millet, flax, corn and pastures; harvesting spring wheat and oats well advanced, about usual yield of medium grade indicated; flax and potatoes generally poor; pastures short; hay ample prospects reduced.

Nebraska-Hot, followed by showers last of week; thrashing and having have progressed rapidly; hay light crop except in northern counties, where good; corn has deteriorated, and in most northern counties will yield less than half a crop, while in southern counties most fie'ds will make but fittle more than fodder; apples and peaches dropping badiy.

Barren Ba How Madge Tilton Lost Her Lover.

BY RUTHELLA SCHULTZ.

"This will do, Jane."

Madge Tilton took from the hand of her maid the article indicated by her words-a white skirt, fresh from the laundry, and threw it on the bed.

"But it is torn, miss," objected the girl, holding to view a large triangular

"Never mind; the ruffling is lovely." "Mayn't I mend it, Miss Madge?"

"No; I've kept Mr. Waterbury waiting too long already. Make haste and button my boots."

But the girl was dissatisfied with the decision of her mistress. Button-hook the tenderness flooding his soul. in hand, she rose from her knees, and throwing open a wardrobe, said in a deprecating tone-"Please, miss, these are all in order. Wouldn't you be after wearing one o' them?"

"Jane! I cannot allow you to dictate to me in this manner. When your advice is asked you may give it-not before. I am partial to the trimming on this skirt and shall wear it. The fact is, you should have repaired it as soon as it came from the wash."

"I hadn't time, Miss Madge-" "No more, Jane. Don't talk to me of time. Here, clasp my bracelet. Now, bring my gloves, and see to it that there isn't a stitch wanting in my wardrobe when I return."

With these words Madge Tilton swept from her boudoir and descended to the drawing-room, where Clarence Waterbury had been waiting her appearance for the last half hour.

Now, there were some ladies of that young gentleman's acquaintance—his sisters, instance—who would have incurred his severest displeasure had they committed a like breach of politeness. But on this occasion, and, indeed, very generally when he called on Miss Tilton, a detention of thirty or more mortal minutes was much less disagreeable than he would have had his sisters believe. In fact, I think he enjoyed it. Do you wonder at this? You need not. He was in love.

On that particular afternoon in early June he was abundantly compensated for his long waiting, when she entered the room and extended her two fair hands to greet him. She looked so neat, so sweet, so trim, and, withal, so airy and graceful in her snowy pique trailing on the blue velvet floor; her dainty jacket to match; her white chip hat trimmed with forget-me-nots; her ornaments and little black parasol. Madge, accordingly, lifted the heavy trail of her skirt, and threw it over her arm. No sooner had she done so than Waterbury changed color, and turned away. She flushed scarlet. There was no room for apology or explanation. It was of little use to let the folds of her dress fall over the hole that was staring like a great reproachful eye into her face. Yet she did so, with a vague sense of relief which forsook her again when she saw the expression of shame and disappointment that filled his eyes, and the painful constraint of his manner as he turned and offered his arm. She accepted it with some slight remark, and a forced laugh. But he could not respond in the same spirit, and little was said. HITS AT FIGHTING BOB.

Ex-Senator Chandler Asks that the Admiral Be Court-Martialed.

Ex-Senator Chandler, once Secretary of the Navy, is playing every card he knows to secure the court-martial of "Fighting Bob" Evans for criticism of the New Hampshire man in "A Sailor's Log." head of the Navy Department, and he has been quietly nursing his wrath. After waiting a reasonable time for a reply and not receiving one Mr. Chandler has determined to force the fighting. He believes more deference should be shown him and that a naval officer should be severely disciplined for discourtesy to his former chief. If ex-Senator Chandler fails to get satisfaction from the department he will appeal to Congress, which body he has many warm friends.

Mr. Chandler denounces Admiral Evans' conduct as "unbecoming an officer and a gentleman." If the charges should be sustained the offense is one which calls for a court-martial, the extreme punishment being dismissal. It is claimed also by some of Mr. Chandler's friends here that Admiral Evans' criticism of a former superior officer for official acts is "conduct to the prejudice of good order and discipline." Such an offense may be punished as a court-martial may direct, the limit being dismissal from the ser-

Sleeps on Train and Loses a Bride-Shot Dead by an Enraged Mother-Fatal Battle in Kokomo-A Woman Driven Crazy by Acid Burns.

Charles Arnold, of Rockport, has retained attorneys to bring an action for \$20,000 damages against the Clover Leaf Railroad Company: Arnold and Mrs. William Stillwell, a widow, were betrothed. Two days were occupied by the groom in getting a license and in a vain attempt to reach the home of his intended bride. He told the Clover Leaf conductor that he wanted to get off the train at Melott and then lapsed into a sound sleep. He was carried miles beyond his destination. Meanwhile the angry bride canceled the engagement by wire. Arnold holds the railroad company responsible for his failure to secure a wife.

BLOW UP ONE COACH.

Force Crew to Cut Mail Cars Loose and Run Them Up the Track.

Four Masked Men Stop Chicago Express, Terrorize Passengers with Bullets, and Blow Up Baggige Car-Failing to Find Treasure Box, They Disappear - Engineer and Fireman Are Compelled, at the Point of Revolvers, to Assist the Desperadoes.

Four masked men held up the New York and Chicago express train on the Baltimore and Ohio Railroad at Calumet Heights, near Chicago, at 8 o'clock Wednesday night. They secured no cash. They blew open one of the baggage cars, thinking it the express car, terrorized the trainmen and passengers by shooting, and escaped in the scrub oak to the west, going toward Tracy, Ind. A reward of \$500 has been offered by the superintendent of the road for any information that will lead to the arrest of the bandits. The express car which the robbers intended to raid contained a \$50,000 shipment to Chicago banks.

The attempt at train robbery is one of the boldest on record. There is little doubt it would have been successful had there been a safe in the baggage car, as the robbers expected. The train was brought to a stop by the swinging of a red light across the tracks. It was in a lonely place with open prairie studded here and there with scrub oak. None of the trainmen made any resistance to the robbers, the shooting kept up by the bandits effectually preventing them making a fight or following the men.

Dynamite Used.

TWO WOMEN LYNCHED.

Betsy McCray, a Negress, and Her Son

and Daughter the Victims. The murder of Mr. and Mrs. Taliaferro at Charleston, Miss., culminated Thursday night in the lynching of Betsy Mc-Cray, her son, Belfield McCray, and her daughter, Ida McCray, all colored. The mob was composed of about 500 white citizens of Carroll County, who marched to the jail in order. Demanding the keys from Jailer Duke, they proceeded to the cells of the negroes, bound them by the necks and hands and carried them to the corporate limits of the town, where they hanged them on a tree by the roadside and riddled their bodies with bullets.

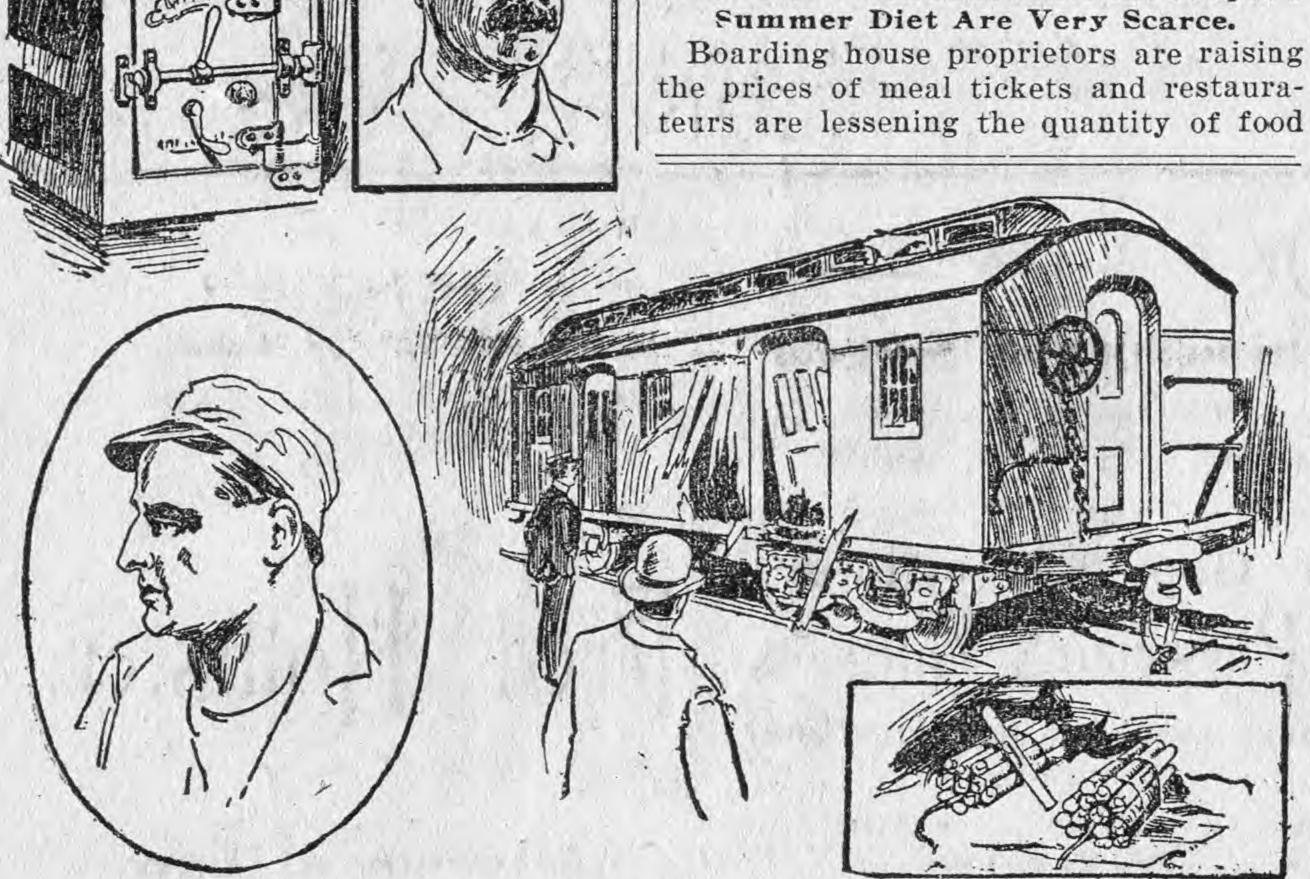

The mob paid no heed to Judge Stevens and W. S. Hill, who stood on the steps of the jail and earnestly appealed to the men in the name of law and order. They even followed the mob to the cell doors, with their arms around the necks of the leaders, pleading with them to let the law take its course, but with no ef- | 6 fect.

Ida McCray confessed to the murder, and said her mother and brother, Belfield, helped. She implicated others. Betsy McCray refused to make any statement.

Ail the time the bandits were operating | with the baggage car, they kept up a constant firing to keep the crew in subjection, and to compel the passengers to remain inside the coaches.

Not finding what they sought, one of the robbers said:

"What will we do now?"

The other said: "Let's get out of this." Both leaping to the ground, they ran to the side of the track, climbed the fence and were lost in the darkness.

While this was going on in the front part of the train the other masked bandits were keeping watch over the train standing on the track. They fired frequently, but no one was hurt, the passengers remaining in the coaches, and the crew making no sign. Just before the robbers who were with the engineer quit the spot, one of them wrenched the engimeer's watch from the chain. NEWS FROM OUR COLONIES.

~~~~~~~ Adulteration of indigo by the natives of the Philippines has almost ruined the export market for this product of the archipelago, and has cut the price in half. According to reports received at the War Department, years ago indigo was one of the important products of the islands. In quality the Philippine article compared favorably with the best grade of the Guatemalan product. It used to bring from 61 to 65 cents per pound, but in 1875 the price fell to 23 cents. At present it fluctuates between 30 and 35 cents. The decline in price was brought | about by the deterioration in the quality, that resulted in a greatly lessened demand. The cause of this deterioration is explained by the fact that years ago the the most primitive methods of preparing indigo, but with the arrival of large numbers of Chinese in the Philippines, the original process was abandoned and the natives began to imitate the Chinese practice of adulteration. It was found that by the admixture of a small quantity of lime with the indigo the coloring matter could be precipitated and the product prepared for the market in a much shorter period. While the more rapid process provided a source of temporary indigo was soon discovered by the purchaser, and the Philippine product, owing to its extensive use of lime, fell into discredit in foreign markets.

During a long talk on affairs in the island of Guam, Gov. Tilley recently gave President McKinley some valuable and interesting information. One of the curious facts brought out was that civil- kind. ization had introduced tuberculosis on the islands. Before the advent of the trousers, shirt and coat the native did not suffer from colds and coughs. When it rained he or she smeared the body effect. The native, however, has not learned how to handle the wet shirt or trousers emergency and the American clad native is therefore contracting the diseases consequent on wet clothes dried said, were wofully ignorant about how to rear babies. The diet never changed when the children were sick. If they had cholera infantum they were dosed with bananas, cocoanuts or raw sweet pickles, whichever happened to be in stock. But for all this Gov. Tilley declared people of Guam are a manly, vigorous race, tractable and anxious to become good citizens. Gov. Tilley impressed on the President that there were great needs for the islanders for industrial and agricultural education. Their ideas were as yet very crude, but they were making progress.

Cuba has a population of about 1,500,-000, of whom 910,000 are native whites, 142,000 foreign whites, 234,000 pureblood negroes, 286,000 mulattoes or halfbreeds and 14,000 Chinese. More than 40 per cent are unable to read or write, and having always been subject to tyranny, do not possess the slightest comprehension of the principles of self-government.

The insular government at Manila has saved \$250,000 by the passage of an act virtually declaring the stone quarries at Mariveles, in the Bataan province, public domain and authorizing the use of the stone in the harbor improvement. A Spanish company is alleged to have established title to the quarries.

#### AN ARMY SCANDAL.

Captain Strong and Lady Hope Figure in a Sensation.

May Yohe, the American actress, has at last got rid of her husband, though, paradoxically, the latter has by no means been relieved of her. As the companion of Putnam Bradlee Strong, son of the late ex-Mayor of New York, she has sailed to join the lotus eaters in Japan, there to live a life of pleasure, free from the censure and the social ostracism which such a life would invite here.

One life she has already ruined, that of her legal husband, Lord Hope. Another life she seems to be leading along the same pathway, that of Putnam Bradlee Strong. His infatuation for her was such that he resigned from the army in order to be in her society and only consideration for him on account of his honorable father prevented his being courtmartialed. While under orders to sail patch. for the Philippines he telegraphed from San Francisco his resignation as captain to the Secretary of War. Mr. Root would have refused to accept it and would have ordered a court-martial were it not that the President interposed and for the sake of the father saved the son from the consequence of his rashness and fa-

An Athletic Millionaire.

The striking of oil on the Texas lands which has made a millionaire of exstriking had been done by the gigantic ing pressures supposed to be sufficient

to kill any ordinary person. Of young Hogg, says Harper's Weekly, it was told that he duplicated the exploit of the South's famous giant at the beginning of the last century, Peter Francisco, of Buckingham County, Virginia, who threw an angry bull, according to tradition, over a nine-rail fence and made him angrier than ever. As a newcomer among American mill- the receipts on July 25 a year ago were ionaires Mr. Hogg will find few physical equals. Most of those who make big fortunes are small men.

Cox, Wis., Aug. 5.-Frank M. Russell of this place had Kidney Disease so badly that he could not walk. He tried doctors' treatment and many different remedies, but was getting worse. He was very low.

He read in a newspaper how Dodd's Kidney Pills were curing cases of Kidney Trouble, Bright's Disease and Rheumatism, and thought he would try them. He took two boxes, and now he is quite well. He says:

"I can now work all day, and not feel tired. Before using Dodd's Kidney Pills I couldn't walk across the floor." Mr. Russell's is the most wonderful case ever known in Chippewa County.

This new remedy-Dodd's Kidney Pills -is making some miraculous cures in Wisconsin.

The Automobile.

The automobile is gradually being adopted for business purposes of all kinds, but it seems likely the undertakers will be among the last to take up the horseless vehicle. So far as known there is only one automobile running in the country in the undertaking business, and that is a wagon used in Philadelphia. One prominent funeral director says he expects to see the motor wagons come into use by the undertaker, and then he looks to see the carriages in funeral processions all motordriven, and, of course, the hearse too. Within five years, this man thinks, there will be seen going along the streets funeral processions in which every vehicle, including the hearse, will be horseless.

How to Tell a Horse's Age.

The popular idea that the age of a horse can always be told by looking at his teeth, says a veterinary surgeon, is not entirely correct. After the eighth year the horse has no more new teeth, so that the tooth method is useless for telling the age of a horse which is more | withdrawn at the same period in 1900. than eight years old. As soon as the Despite the increase in the withdrawal, set of teeth is complete, however, a wrinkle begins to appear on the upper edge of the lower eyelid, and a new wrinkle is added each year, so that to get at the age of a horse over eight years old you must figure the teeth plus the wrinkles.

Instead of falling off \$3,300,000 month, as was figured would be the result of the reduction of the war taxes, the receipts for the first month of the fiscal year will be a million dollars more than the corresponding month last year. The first twenty-five days show an increase of \$749,924.62 over the receipts for the corresponding period of 1900. In other words, the receipts for the month of July will be nearly four million dollars in excess of the estimates. Each day has shown its increase. For example, \$913,481.93; for the 25th of the month this year they were \$980,092.89. The internal revenue receipts of the month, as shown by the statement compiled July 26, were \$23,079,723.71. The receipts for the same period last year were \$22,329,-799.09. Secretary Gage has looked at these figures and been puzzled by them. Even allowing for a certain falling off, which is regarded as inevitable, it begins to look as if there must be a vastly increased sale of the articles which are the revenue producers. Secretary Gage says it is early yet, and there may be some temporary condition not apparent on the face which is responsible for the stimulation of revenue. He is not willing to admit that his estimate of \$40,000,000 reduction is \$40,000,000 out of the way. He will not admit it on the basis of a twentyfive days' showing at any rate. The customs receipts for the first twenty-five days of this fiscal year are greater than last year by nearly a million dollars. The month's receipts were \$17,303,966.01; for the same period last year, \$16,097,611.16. There is always a deficit at this time of the year. Last year the total expenditures were \$43,555,000. The war expenditures are the largest item-\$14,130,000. Pensions cost this year \$10,335,000. The civil and miscellaneous are only \$11,360,-

It is believed by those who have been keeping in close touch with the arranger ments for the court of inquiry in the Schley case that a series of sensations will result as the outcome of the investigation. The precept that was issued is considered by the unprejudiced as a bill of indictment found by the Navy Department against Admiral Schley. It is understood pretty generally that jealousy is rampant in the navy. While it is firmly believed that Admiral Schley will be given the hot end of the hearing, notwithstanding the precautions that Secretary Long will throw about the inquiry, there is an undercurrent of opinion that the admiral realizes this, and in view of his speedy retirement from the navy purposes to open up to public gaze all the ins and outs of the naval management in times of peace and war, at home as well as abroad. If there is any truth in the The list of resorts includes Milwaukee, stories of jealousies and improper striving for official preferment that have been bruited about for years past in a more or less aggravated form, it is believed they will be presented by Admiral Schley and his counsel at the court of inquiry in such a manner as will gravely accentuate the fact that has heretofore been intangible gossip.

> Up to date something like \$4,000,000 have been withdrawn from New York and sent West to move crops. The withdrawals have been as follows: To New Orlean's, \$2,235,000; to Chicago, \$1,300,-000; to Cincinnati, \$100,000; to St. Louis, \$225,000. The money has been mostly in currency of small denominations-\$20 notes and under. The money sent West thus far is about \$700,000 more than was the Treasury officials have no fear of ill consequences on the New York money markets, such as occurred last year. It will be recollected that money was then taken out of New York at such a rate as to create almost a panic in Wall street. Nothing of this sort is anticipated now, however, the department having an ample supply of money on hand to meet the demands.

It is estimated that the cost of the Sampson-Schley court of inquiry will be about \$25,000. This estimate is based on what Navy Department officials have an examination of probably a third more witnesses than are now contemplated the expenses would perhaps be \$35,000 or \$40,000. Secretary Long and Captain Cowles, Assistant Chief of the Bureau of Navigation, expressed the opinion that the inquiry would not be an expensive affair. The opinion of a very high naval official is that not more than a month will be required to thoroughly investigate all the points in issue. Two months, however, would not be too large a margin considering that many new issues may be sprung.

Secretary Long has issued imperative orders prohibiting naval officers publicly discussing the Sampson-Schley controversy. It is the purpose of the Secretary Charles J. Delvin, a Topeka millionaire, to keep the case out of the newspapers as much as possible until the court of inquiry meets. In Washington there is not much danger of the service being demoralized by the conflicting claims, as nearly all officers about the Navy Department are partisans of Admiral Sampson, and can see only his side. Nevertheless, the Secretary has decided that there has already been too much talking, despite an old order which prohibits officers discussing matters pertaining to the personnel of the navy without first obtaining permission from the department.

### Cured of Catarrh of the Stomach by Pe-ru-na.

CONGRESSMAN R. W. WILCOX. Delegate to Congress from Hawaii.

Hon. Robert W. Wilcox, Delegate to Congress from Hawaii and the Sandwich Islands, in a recent letter from Washington, D. C., writes:

"I have used Peruna for dyspepsia, ment of your case and he will be pleased to and I cheerfully give you this testimonial. Am satisfied if it is used Hartman Sanitarium, Columbus, O.

properly it will be of great benefit to our people. I can conscientiously recommend it to anyone who is suffering with stomach or catarrhal troubles."-R. W. Wilcox.

All over this country are hundreds of people who are suffering from catarrh of the stomach who are wasting precious time, and enduring needless suffering. The remedies they try only temporarily palliate the distress, but never effect a cure. Remedies for dyspesia have multiplied so rapidly that they are becoming as numerous as the leaves of the forest, and yet dyspepsia continues to flourish in spite of them all. This is due to the fact that the cause of dyspepsia is not recognized as catarrh.

If there is a remedy in the whole range of medical preparations that is in every particular adapted to dyspepsia, that remedy is Peruna. This remedy is well nigh invincible in these cases.

Dr. Hartman, President of the Hartman Sanitarium, Columbus, O., says:

"In my large practice and correspondence I have yet to learn of a single case of atonic dyspepsia which has not either been greatly beenfited or cured by Peruna."

No one suffering with catarrh of the stomach or dyspepsia, however slight, can be well or happy. It is the cause of so many distressing symptoms that it is a most dreaded disease. Peruna acts immediately on the seat of the trouble, the inflamed mucous membranes lining the stomach and a lasting

cure is effected. If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full state-
