CULVER, INDIANA, NOV. 8, 1905.

ENGLISH SPARROW A PEST SAYS ENTOMOLOGIST FORBES

Illinois Official Declares Bird is Extremely Injurious to the Farmer and Should Be Destroyed.

Prof. S. A. Forbes, state entomologist for Illinois, after devoting years to the study of birds, declares that the indictment against the English sparrow was properly taken and the bird should be destroyed. He is now telling the farmers' institute of each county in the state the results of his observations and his discoveries are attracting much attention. He has killed in all 10,000 birds justifying his action by the knowledge that a scientific investigation of what birds ate would save the lives of multitudes of their kind. He is said to know more about birds than any other man in the world.

During the past year Mr. Forbes took a census of a farm in order to determine about how many birds existed to the acre. He was surprised to find that the average was less than three, about 2.8, to be exact. A total of fifty-four kinds of birds were recognized, although there are supposed to be over 300 species common to Illinois. The estimate was 1,267 birds to each square mile. In dividing the birds seen while this census was taken it developed that 41 per cent were blackbirds, 19 per cent English sparrows; 11 per cent cow birds, 4 per cent meadow larks, 3 per cent mourning doves, 2 1/2 per cent robins, 2 per cent brown thrush, 2 per cent horned larks. Four per cent of the birds, following an

analysis of the stomachs, were found to be purely useful; 44 per cent decidedly useful, 2 per cent moderately useful, while 55 per cent were of rather doubtful utility. Nineteen per cent the English sparrows, were found to be decidedly injurious.

Winter birds were found to be more largely useful than the summer birds, as they destroyed noxious weeds, while the summer birds live more largely on insects. "Purely useful" means doing no damage. "Decidedly useful" means that the benefit is considerably more than the damage done, while "moderately useful" means that the benefit, while not large, is plainly more than the damage.

The meadow lark was found to be the most useful of all birds on the farm. Of the 288 specimens killed in the various portions of the United States it developed that 73 per cent of their food was insects and the remainder grub worms and caterpillars. The meadow lark upon a square mile are worth \$400 to the farmer. The robins were found to have eaten seventeen quarts of caterpillars to each twenty-four quarts of fruit. Prof. Forbes favors the destruction only of the English sparrow, which he brands as the "outlaw" bird. He believes the only efficacious method of destruction is to destroy the eggs as rapidly as they are laid.

The success that has attended the two-cent passenger rate on the New York, New Haven & Hartford railroad is said to have been achieved directly against all predictions by the officials. Not only has there been no loss, but the increased business has increased the gross receipts. This is the uniform history of all such experiments. There has never, or rarely ever been a reduction of rates that has not been opposed by the officials, and there has never been a case reported where the reduced fare failed to be profitable and called for a restoration of the old rate. No such case at least is now remembered.

Justice and Precedent.

In replying to George E. Cole's criticism of the action of the branch appellate court in granting a supersedeas to John A. Cooke, Judge Baker said:

Nothing was done in the Cooke case that has not been done hundreds of times before in similar cases. The practice followed ever since the establishment of courts in Illinois was adhered to in every detail.

The action in this case is supported by precedent, as Judge Baker says. So are all judicial abuses with which the people of this country are becoming very much out of patience. There is precedent for interminable and nonsensical delays in the selection of jurors. There is precedent for decisions setting aside just verdicts for technical error. There is precedent for many practices and rulings that result in the miscarriage of justice and the freeing of prisoners who are clearly deserving of punishment. The trouble with the bench and the bar—with notable exceptions—is that they are content to go on making use of precedents of these kinds, thus allowing the administration of justice to fall into disrepute.

Draw the Line.

The following, which was written soon after an unusually bad outbreak of deviltry on the part of some high school lads in another town, is worth the attention of the Citizen's readers. The suggestions are applicable to the halloween season as well to the special occasions when hazings and mischief-making of other sorts are brought to public notice:

Where shall the line be drawn between legitimate fun that is the outcropping of a superabundance of youthful spirits, and the puerile and malicious mischief which the fun is prone to develop into?

The class spirit is a good thing until it runs into class riot. The class spirit in its best sense means a friendly rivalry between classes which result in better scholarship, better essayists and declaimers and better athletes. In the poorer sense it means rowdiness that breaks windows, steals refreshments, destroys property and fires pistols into the faces of horses which might result in a runaway and a loss of life.

Modernized "America."

When Samuel Francis Smith wrote "America" in 1832, the United States wasn't the "great shakes" that it is now. In view of our expansion Dr. Henry Van Dyke, a preacher and author of fame, has proposed the addition of the following two verses to the hymn, and the Citizen is glad to adopt them:

I love thy inland seas,
Thy groves and giant trees,
Thy rolling plains;
Thy rivers' mighty sweep,
Thy mystic canons deep,
Thy mountains wild and steep,
All thy domains.
Thy silver Eastern streams,
Thy Golden Gate that stands
Fronting the West;
Thy flowery southland fair,
Thy sweet and crystal air
O, land beyond compare,
Thee I love best!

Tons of Cabbage.

Benjamin Kantner, a farmer residing in Kosciusko county, among his other products this year raised 51 tons of cabbage from 2 1/2 acres of ground. He sold the entire product to the canning factory at Pierceton at the rate of \$4 per ton—not bad for such a small amount cultivated.—Exchange.

For Sale—A few second-hand Base Burners as good as new. Culver Cash Hardware Co.

Files quickly and positively cured with Dr. Shoop's Magic Ointment. It's made for piles alone—and it does the work sure and with satisfaction. Itching, painful, protruding or blind piles disappear like magic by its use. Large nickel capped glass jars, 50 cents. Sold and recommended by T. E. Slattery, druggist.

A Perfect Ear of Corn.

Prof. G. I. Christie of Purdue university in his address at the Starke county corn school said that a perfect ear should be about 10 inches long, and at least 7 inches in circumference at the middle. The rows should be regular and the kernels should grow over the point of the ear. The butt of the ear should be covered with kernels down to the stalk, and the opening should not be larger than a silver quarter. The professor stated that not over 50 per cent of the corn on exhibition would grow, owing to the fact that it had been frozen while it was yet full of sap. He thinks the white corn is not adapted to this county, but advises planting the yellow next year, saying that it would soon acclimate itself.

The Road Drag.

The farmers should not altogether forget the road drags. This is just the season of the year when they should be most in sight and in use every time there is any time to spare from farm work. A heavy rain in the late fall or early winter generally puts the roads in an almost impassable condition and with a freeze they remain rough all winter long. There is one thing about the roads worked with a road drag that is very much in their favor, and that is they are used almost exclusively on one side as a rule, and by the time they get out up to any great extent the other side is firmly settled and dry and will stand the travel. Keep the road drag in working order if you want good roads.—Exchange.

The Two Men Who Broke Into a Nickel Plate Freight Car.

The two men who broke into a Nickel Plate freight car and stole a case of shoes belonging to J. Saine & Son of this city were found guilty at Knox last week. The older of the two received a three years' sentence; the younger, a boy, 30 days in jail.

Trustee's Notice.

After April 1st, my weekly office days, for the transaction of real estate business, will be as follows: Tuesdays at my residence, and Saturdays at my office over the Exchange Bank, Culver. FRANK M. PARKER, Trustee.

WE carry one of the largest stocks of men's, boys' and children's clothing in this vicinity. It represents a greater variety of styles and patterns than you can find if you were to travel miles.

WHY IS THIS? If we were not able to satisfy customers, if we did not have the goods they were looking for they would go elsewhere. Every time a merchant loses a sale he makes a good customer for one of his competitors.

THIS is reason enough for our putting forth the utmost efforts to keep a stock of the most up-to-date clothing as regards style, quality and correct sizes.

ISN'T it reasonable to expect that you can do better in buying of us than you could elsewhere?

Why Not Save Money?

Ought you not to receive an offer to save one-third of your coal bill with consideration?

Storm Sash Will Do It. Storm sash will keep out the cold wintry blasts and make the home infinitely more comfortable, with one-third less expended for fuel.

Avoid Cold Drafts caused by the air striking the frosted window panes when without storm sash and then falling on the floor, making cold feet and bringing on colds. Storm sash prevent these cold draughts and your windows are never frosted. Let us figure with you on the cost of storm sash. You'll be surprised at the cheapness.

And Remember that when your house is fitted with the sash the saving of fuel goes on year after year. It's like putting money in the bank.

Do It Now. When the cold weather fully sets in orders come in with a rush and then you will have to wait your turn. Be forehanded and put your order in at once.

VALUE OF FERTILIZERS PROVEN BY EXPERIMENT

Tests on Wheat Conducted by State Chemist Goss Show Its Use to Be a Paying Investment.

Arthur Goss, state chemist and director of the Indiana Agricultural Experiment station at Purdue, has completed tests conducted in several parts of the state for several years past which show conclusively that it will usually pay well to use fertilizer on wheat. While different soils or even the same soil under different methods of treatment, require somewhat different fertilizers about the only sure way of determining the exact needs of a particular soil is by the trial of a series of fertilizer tests on the same, it may be said in a general way that wheat soils of the state are usually benefited by all three of the essential fertilizing elements, viz., nitrogen, phosphoric acid and potash. Of these three elements phosphoric acid is usually needed in largest amount. A fertilizer containing about 2 per cent of nitrogen, 8 per cent of phosphoric acid and 2 per cent of potash will produce profitable results in most cases and is very commonly used. If employed in addition to a heavy crop of clover the percentage of nitrogen may be reduced, but if used on land that has not been manured or clovered for several years the percentage of nitrogen can profitably be increased somewhat. Legume crops (beans and cow peas) should, however, be

used to supply nitrogen whenever possible, as they afford far the cheapest source of this element.

The Goss experiment shows that on some of the wheat solids of the state somewhat more than 2 per cent of potash can be used with profit but on most of the yellow and red soils this amount should be sufficient. A fertilizer of the 2-8-2 composition may be purchased already mixed or it may be compounded at home from raw materials. If mixed at home the nitrogen may be secured in the form of bone, tankage, nitrate of soda or dried blood. The phosphoric acid may be derived from acid phosphate or bone. Raw rock phosphate or "floats" is not recommended. This material is not sufficiently available to produce satisfactory results in a single season. Potash may be derived from either the muriate, the sulphate or kainit. A good wheat fertilizer having the nitrogen phosphoric acid and potash in about the same proportions as the 2-8-2 formula can be made by mixing eleven parts of sodium nitrate 14 to 16 per cent N; 15 parts of steamed bone, 1 to 2 per cent, 20 to 30 per cent P2O5; 30 parts of acid phosphate, 14 to 16 per cent available P2O5; sulphate or muriate of potash, 48 to 50 per cent, K2O.

NOVEMBER WEATHER

A Stormy Outlook is the Forecast of Rev. Irl Hicks.

A regular storm period is central on the 9th, extending from the 7th to the 12th. By the 9th the growing storm conditions will have increased, so that general cloudiness and rain will be in progress in the western sections, and during the 10th, 11th and 12th rain, turning to sleet and snow on the western flanks of storm areas, will progress to the east across the country. This is another period which promises to be prolonged into a spell of unsettled, if not continued rainy, snowy, stormy weather.

One of the most severe disturbances of the month will culminate within forty-eight hours of noon on the 16th. The barometer will drop to one of its lowest readings for the month, thick cloudiness and great humidity will prevail, and general storms of autumnal rain, turning to destructive sleet and later into blizzardous snow, and northwest gales may be expected, covering the northern and extending far into the central sections.

A regular storm period extends from the 19th to the 23d with thick, prolonged cloudiness, sleet and snow. Falling barometer, higher temperature and greatly increased intensity in storminess will develop and pass rapidly to the eastward about Tuesday the 20th to Friday the 23d. Cold, high winds out of the northwest will rush in behind these storms as the high barometer moves eastward and southward, displacing the storm areas. Sharp cold with frost and freezing toward the north, will visit most sections from about the 22d to the 25th.

A reactionary storm period is central on the 25th, 26th and 27th. This will insure more or less rise in temperature, with decided fall of the barometer, cloudiness and return of rain or snow. The disturbances of this period will culminate on the 26th and 27th, by which dates storms will have passed well to the east.

A regular storm period begins on the 29th, and runs at least four days into December, being central December the 2d.

Unprofitable Trees.

There are two trees, the silver maple and the cottonwood, which are more popular with the mass of tree planters than all other shade trees in America. Both have one fatal qualification, that of a rapid growth. Losing sight of perma-

nency and many more excellent qualifications, these two inferior trees are planted to the exclusion of all other trees.

Both these trees are short lived, very much diseased, attacked by innumerable insects, while both are seriously damaged by wind-storms. Both require much water and send their roots into sewers, wells and cisterns, which they frequently destroy.—Arboretum.

COLE'S HOT BLAST

Wonderful Heater and Fuel Saver

For Soft Coal, Lignite or Hard Coal

Cost of Stove Saved in Fuel

As you know one-half of soft coal is gas—the entire gas supply for many cities and towns being made from the same kind of soft coal you are using. The extent of unburned gases in hard coal is shown by opening the magazine cover of a base burner when the extra oxygen supplied fills the entire stove with flaming gas. Other stoves allow this gas, which is the best part of the coal, also a large part of the heat, to pass up the chimney. This waste will average from \$10.00 to \$50.00 a year for every family and millions of dollars in fuel are thus wasted annually.

The Original Cole's Hot Blast Stove
Saves All Wasted with Other Stoves

Cole's Original Hot Blast, by means of the Patented Hot Blast draft used in connection with other patented features, distills this gas from the upper surface of the coal, utilizing it as a heat producer along with the fixed carbon or coke in the coal.

On account of the patented air tight and gas tight construction giving perfect control over the drafts, it also saves the heat usually wasted up the chimney. \$5.00 worth of hard coal, soft coal or lignite, or a \$1.50 ton of slack or coal savings is thus made to do the work of twice the amount of fuel in other stoves and the cost of the stove is more than saved in fuel each winter. \$7.50 worth of slack will heat your house all winter, five tons at \$1.50 a ton does the work.

Build only One Fire a Winter

Cole's Hot Blast is so perfect in construction that fire keeps all night, and when the draft is opened in the morning will burn two or three hours with the hard coal or soft coal put in the night before. No other stove does this. Fire, therefore, never goes out, kindling fires is dispensed with, and the rooms are kept at an even temperature all the time.

Read the Guarantee. We are the exclusive agents for Cole's Original Hot Blast and sell it on the accompanying guarantee which cannot be made on any other heating stove in the world. If you want to save half your fuel bill and would enjoy the luxury of getting up in a warm house on cold winter mornings without kindling fires, buy Cole's Original Hot Blast now.

Avoid Imitations

Imitations of this Original Hot Blast are many. None of them has the absolutely air-tight and gas-tight construction throughout which Cole's Hot Blast has by reason of its numerous patents. A Patented Steel Collar connects the elbow draft to the stove body and cannot open by action of the fiercest heat. The Patented Compound Hinge on the lower draft cannot warp, and the draft door closes air-tight by its own weight. The guaranteed Smoke-proof Feed Door prevents smoke, dust or gas escaping when fuel is put in the stove.

Imitations soon open seams and cracks which spoil them for keeping fire and cause the gas half of the coal and much of the heat to escape up the chimney.

See the name "Cole's Hot Blast from Chicago" on the feed door of our stove. None genuine without it.

Ask to see the patented dustless ash cover for removing ashes. Our method is the only clean way.

Sold by Culver Cash Hardware Company

Guarantee

We guarantee every stove to remain absolutely air-tight as long as used.

We guarantee a uniform heat day and night with soft coal, slack, siftings, or hard coal.

We guarantee that the rooms can be heated from one to two hours each morning with the soft coal, slack or hard coal put in the stove the evening before.

We guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with same heating surface.

We guarantee the feed door to be smoke-proof and that the stove will hold fire with soft coal, hard coal or slack thirty-six hours without attention.

The above guarantee is made with the understanding that the stove be operated according to directions, and set up with a good fire.

Shows Stove Burning Soft Coal

CULVER ACADEMY

Latest News and Gossip of the Big School

The defense put up by Luke Forest was the strongest which the academy has encountered this year. The boys in the black and yellow were very quick on their feet and often succeeded in getting after our players before the ball was well in play. A short punt dropped only a few yards ahead of the line where one of their players was usually ready to receive it, proved one of their best means of gaining ground when the ball was in their possession. It was interesting to note how both sides failed in attempts at a place kick for a goal when conditions were favorable, whereas last week with everything in the weather line against her, Culver was able to score in this way. The score, 11 to 0, was all made in the second half of the game and gave the rooters so much joy that they carried both teams, regular and substitutes, and coaches, from the field. It certainly shows a fine spirit when the defeated opponent is thus treated with the same enthusiastic manner as the home team.

On Thursday evening Nov. 1, a preliminary oratorical contest was held in the chapel to decide what cadet should represent the academy at the inter-academic contest held under the auspices of University of Chicago the latter part of this month. Cadets Temple, Mayer and Chapman entered the preliminary. The first named gave Senator Thurston's speech upon "Cuba," Cadet Mayer rendered Grady's "New South," Cadet Chapman, Grady's "The American Home." The contest was closed and required a careful discussion and weighing of the work and possibilities of each speaker. The award was finally made to Cadet Mayer, who will, therefore, after some special training by Captain Rarig, go to the contest in Chicago.

A recent chapel talk the superintendent explained to the cadets some of the medals and prizes which are open to the cadets of Culver. This oratorical prize, a year's tuition in the University of

Chicago, was one of the prizes referred to as also the oratorical medal awarded each year to the winner of the final contest, held in June. He also explained the conditions of the Oxford scholarships which, amounting to \$1,500 per year for three years, are open to two students from each state of the union. The Culver cadets were urged to keep at least one representative always among this chosen group of American students. Mr. W. A. Fleet is the holder of one of these which he won after completing his work at the University of Virginia.

Following the custom of previous years the authorities of the academy arranged an entertainment for Halloween. This year it was a musical program given by the American Ballads Co. The work of the company as a whole was mediocre, that of the pianist alone being worthy of comment for her technique. After the concert the evening was given a genuine touch of Halloween by gingerbread and cider, served to the boys in the mess hall.

The coach of the Lake Forest team is Hirschberger who, when a member of the Chicago team, was noted as the best punter and drop-kicker in the country. His closest rival was the famous Wisconsin fullback, "Pat" O'Dea. Mr. Hirschberger was accompanied to Culver by Mrs. Hirschberger.

Among the visitors at the academy Saturday and Sunday were several of the former cadets of C. M. A. Auburn Novels '02, J. E. D. Meador, M. C. Mattinson '05 and F. G. Eberhard '06, all students of the University of Chicago, and L. G. Borrow of Gibson City, Ill., made up the delegation.

P. T. Bryan, a cadet of C. S. N. S., was one of the Lake Forest rooters at Saturday's game.

Mrs. L. R. Gignilliat was the guest of friends in Logansport and Lafayette last week.

A GREAT SHOW.

International Live Stock Exposition at Chicago.

In addition to the practical demonstrations of the breeders' and feeders' art in cattle, horses, swine and sheep on exhibition in single groups and car load displays, there will be this year meetings of breed associations where the foremost breeders and feeders of the day are to discuss their work.

On Monday night, December 3, the annual meeting of the International Exposition association is to be held.

On Tuesday night the following breed associations meet:

Pereheron Society of America.
American Shire Horse association.

American Cotswold Sheep society.

American Oxford Down association.

American Suffolk Flock Registry.

American Clydesdale Horse association.

American Southdown Breeders' association.

On Wednesday evening:

The American Short-Horn Breeders' association;

The American Aberdeen-Angus association;

The American Galloway Breeders' association;

The American Berkshire association, and

The Hampshire Down Breeders' association, will hold their annual meetings.

On Thursday afternoon the American Red Polled Cattle club meets, and in the evening

The American Poland China Breeders' association and the Yorkshire Swine association meet.

WASHINGTON WARBLINGS

The quarterly meeting was well attended Saturday and Sunday at the West Washington church. They have been doing lots of good work on the roads in this district the past two weeks. Charley Kline and Mr. Travert of Nappanee came down Sunday in an automobile and attended quarterly meeting and took dinner with the former's parents, Mr. and Theodore Kline. Ed South and family were Sunday guests of Ollie Jones. Sherman Warner and wife of Chicago are visiting B. Krans and family. A crowd gathered Monday evening and gave Lucius Lockwood and wife an old-time belling. Don't forget the quarterly meeting Saturday and Sunday at the East Washington church.

NORTH UNION NUGGETS.

There will be a box social at the Castleman school house Saturday evening, Nov. 17. Everybody invited. Mr. and Mrs. Geo. Osborn and daughter Mabel were in Knox last Thursday. There will be services at the North Union church next Sunday at 2:30. Arthur Castleman and family, Mrs. Carrie Grove and family and Mrs. Nancy Pettis visited Wm. Castleman and family. Supt. Dunn visited our school one day last week. Mr. and Mrs. Eli Mock and Louis Carpenter visited Benj. Hawkins and wife and Miss Edith Carpenter Sunday. Mrs. David Meuser is still on the sick list. Misses Klatt and Otto Miller were Sunday evening callers on Myrtle Grove.

Closing Out Our Cloaks.

Our entire stock of ladies', misses' and children's coats will be closed out at prices that will not be duplicated anywhere. Every garment in the house goes, including our latest purchases of up-to-date patterns. Porter & Co.

Watch for Dillon & Medbourn's great ad. on flour next week.

MOUNT HOPE MAGNETS.

Edwin Hartle of Illinois is here for a few days at home. Mrs. Josie Tyner of Culver visited her sister, Mrs. Noah Wagner, last week. Frank Berry, Lewis Overmyer and family of Leiter's and Sylvester Grove and wife spent Sunday with C. S. Meek and wife. Mrs. John Brugh's condition remains about the same. Jesse Crobb and family of Leiter's and Arthur Sturgeon spent Sunday at Louis Polley's. Walter Hartle of Leiter's and Mr. and Mrs. Fred Hartle spent Sunday with his parents, Mr. and Mrs. Jacob Hartle. Louis Polley is moving to the Adam Reish farm northeast of Leiter's. Protracted meeting commences at this place next Monday evening.

DELONG DOINGS.

Miss Daisy Meredith spent Sunday with Miss Mary Kaley. Miss Lianna Dinsmore is on the sick list with a serious attack of lung fever. Miss Mandy Shadel spent a few days in Logansport with her sister, Mrs. Roy Hay. Mr. and Mrs. Ike Edgington and daughter spent Sunday at Thos. Meredith's. Mr. William Hand of Etua Green spent a few days with his brother John and family. Samuel Heeter and wife are spending a few days with relatives in Delong.

DUTCH STREET.

Fall work is progressing rapidly. Ross Clemens is on the sick list. Ollie Baker has moved into Robert Monroe's house. Miss Dola Schrock made a trip to Chicago last week. Ollie Listenberger of this place is making some improvements on his house. John Crum and wife visited Julius Clemens and wife Sunday. Lou Pero is making a great improvement by painting all of his buildings white. James Miller and wife visited the latter's parents at Peru Saturday and Sunday. Al Triplet and family were the guests of Mell Triplet and family Sunday. Henry Listenberger and wife transacted business in Plymouth Thursday. Misses Verna Behmer and Rosa Lidecker attended teachers' institute at Culver Saturday. Dola Schrock returned from Knox Friday to spend a few weeks with her parents. Sullivan Stack, who has been sick all summer with rheumatism, is no better at this writing. Supervisor Plat Dickson is graveling the road north of Hibbard. The work is a much needed improvement. Ad Listenberger and wife and Henry Landeman and family of Wolf Creek spent Sunday with W. H. Listenberger and family. M. E. Schrock and wife of Knox and Misses Belle Schrock and Marie Berg of South Bend visited at E. D. Schrock's last week. Misses Irene Bogardis and Verna Behmer, teachers, wish to announce that a box social will be held at the Hibbard school house Friday evening, Nov. 9. Proceeds to be used in buying new books for the school library. Everybody invited.

MONTEREY MORSELS.

R. Gers and family are this week loading their household goods to be shipped to Huntington, where they will make their home. A. C. Wolfram, rural carrier on route No. 1 from this office, lost another horse by death yesterday. This makes three horses he has lost in the past seven months. S. H. Schuh was here from Walkerton over Sunday. Mr. Schuh formerly resided in Monterey, removing to near Walkerton about five years ago, where he was successful at farming. At a box social held in the Center school house, in North Bend township, F. O. Edwards, teacher, Saturday night, \$28.50 was realized. The highest price paid for a box was \$1.50. George Sellers, the silver-tongued auctioneer of that township, did the crying, and made a great hit when he sold a can of cherries for \$20.65. H. S. Fansler left yesterday for Poplar Bluff, Mo., where he is being sent by the Fairbanks Steam Shovel Co. of Marion, Ohio, to construct a dredge boat 24x70 feet, which will have a capacity of 1 1/2 yards. Mr. Fansler is becoming an expert in this line and has during this year built three boats for this company, one in Iowa, another in Minnesota and one in the northern part of this state. The one built in Minnesota is now being operated by Earl L. Fransler, his son, he helping to construct it.

HIBBARD HAPPENINGS.

Will Kline is again able to be out and around. Mrs. Chloe Brooks visited her parents at this place one day last week. Mrs. C. D. Andrews and Mrs. Yeoman went to South Bend last Monday. Mr. and Mrs. Samuel Strohl and S. E. Wise and family were the guests of S. S. Reed and family last Sunday. James R. Miller and wife returned from Peru, where they have been visiting friends, last Monday. S. E. Wise went to Argos on Monday last. Mrs. Yeoman and little Ethel called on Mrs. S. S. Reed Sunday evening. Homer Rockhill is laid up for repairs. Oscar Voreis was on our streets Sunday. Your correspondent of Hibbard has returned from a few weeks' visit with friends in Arkansas. There will be a box social at the Hibbard school house Friday night of this week.

MAXINKUCKEE MURMURS.

The Ladies' aid will meet with Mrs. Jane Stevens on Thursday afternoon, Nov. 8. Sherman Warner, wife and daughter Helen of Chicago are spending several weeks with Mr. and Mrs. D. W. Marks. Mrs. Nettie Blair and children of Bolivar, Ind., visited over Sunday with P. Spangler and family. Mr. and Mrs. C. G. Bigley made Argos a business call Saturday afternoon. Logan Moore has been selling and delivering potatoes in this vicinity during the past week. He raised over 300 bushels. Dow Rector and family are visiting relatives in Mishawaka. Edgar Benedict has returned home from Washington state where he has been working for the past ten months. He talks of going to China soon. Repair work will begin on the church this week.

Your Attention IS CALLED TO THE

Special Cut Price Stock Reducing Sale

NOW IN PROGRESS AT

The Surprise Store

This of a bonafide sale of the choicest goods, brought about by the purchase of those store rooms by Hessel Brothers, now under way to entirely remodel and enlarge to almost double its former size.

THE PRICES ARE CUT TO THE CORE ESPECIALLY ON ALL OUR MEN'S, BOYS' AND CHILDREN'S CLOTHING

Our Sale has a object; it is no humbug like so many fake sales where they try to save you two cents on a pair of pins and overcharge you a dollar on a boys' suit or a man's overcoat. We build up our business on honesty, square dealing, push and live business methods, and we will grow bigger still, by selling more merchandise of better quality on an actually smaller margin of profit. Come and supply your wants and save money.
