From Washington.

Following are such portions of a letter from Ed Zechiel to his parents, Mr. and Mrs. J. H. Zechiel, as will be of general interest to Citizen readers:

NORTH YAKIMA, Wash., Nov. 17 -We have been in Washington a little over two weeks and it seems like one long vacation. We have been at work most all of the time, but the weather is so very fine and the country so nice that each day seems like a holiday. The man we are building for was not quite ready when we got out there so we dug potatoes for Louis' uncle for a week, then went fishing up in the mountains two days.

I wonder how you people would like to raise potatoes such as we dug. We took out 35 tons of market potatoes and about 10 tons of others which they call second home, 11 miles from Vories', to class, but which would make a fair take care of her daughter when Indiana crop-45 tons off three she, too, was taken down, and was acres. They are worth now \$17 unable to return home. Her age per ton and they expect them to go to \$20 before long, which would She had resided on the home place mean \$900 from three acres.

Last Friday and Saturday Louis and his uncle and I drove about 40 miles up in the Cascade mountains and fished. We caught twenty large brook trout and of course I had to catch eleven of them myself. Talk about catching black bass! They are tame beside a trout. I caught the largest one of the lot-22 inches long. and had about twenty minutes of the prettiest scrap you ever saw before I landed him.

ARE INJURED

BY SENDING MONEY TO ENRICH MAIL ORDER HOUSES.

VALUE OF FARM LAND HURT

Prosperity of Town and Prosperity of Country Surrounding It Are Identical-Local Merchant Is Friend of Farmer.

A writer in the Fullerton (Neb.) News-Journal gives some pointed reasons why the farming community surrounding every town should get behind the town and push its business interests, urging consideration of what that would mean compared to patronizing mail order houses. If the town grows, land values grow all around it. If business men are compelled to reduce their stocks or go to other fields in order to get business, it is not the town only but the farming community that suffers. The question is asked, what personal interest is it to any one in that country to enrich the mail order houses? The money spent away from home is taken from the prosperity of the town, and just as directly from the prosperity of the country surrounding it. The writer declares that it is as much to the interest of every man who owns a farm in Nance county to keep Fullerton flourishing as it is for the people inside the city to keep it flourishing. The continued growth of a good town always gives added value to all farm lands adjoining. The local merchant in a town is the friend and neighbor of the farmer. The mail order house is nothing of the kind, and it cares nothing for the individual interests of the farmer except to get his money. The local merchant, besides bearing his share of taxes, is always assisting the churches and charities of the community. No such help comes from mail order houses. The larger business that is given to the home merchant allows him to carry the larger stock and to sell at a smaller margin. To sacrifice your home town is to depreciate local real estate values and retard the growth of values of both town and farm property. The town that seems prosperous and looks prosperous invites investment not only in the town, but in the locality, so that a stranger, looking for a location, becomes interested and a purchaser, while he would ordinarily leave the dead town and its surrounding territory out of consideration.

Deal in Shoddy Clothing.

Many of the old-timers these days wonder why the clothing they used to wear years ago was so much better than is now securable unless extremely high prices be paid. A little thought makes an explanation easy. This is an age of advancement in every way, and frauds increase along with improved machinery, scientific methods, etc. In fact the whole system of improvement seems to involve means of lessening cost of production.

Thirty years ago such a thing shoddy was not known. When one purchased a suit of clothes, it was "all wool," but at present it is an exceptional thing in cheaper garments to find this the case. The reports of the government show that each year hundreds of tons of shoddy, or woolen goods ground up, are imported into the United States, and a heavy duty paid on the same. This shoddy is manufactured into cloth by various processes. It is most often woven around a cotton thread, and sometimes is forced into the texture after the cloth is woven. In samples sent out by the cheap clothing concerns, this shoddy can be picked out. Often it is so loosely woven that if a bit of the cloth be crumbled between the fingers, it will fall out in the form of dust. Great quantities of this cloth are utilized by the makers of cheap clothing who do business through the mails direct with the wearers. A suit of this kind can be purchased from eight to \$20-and dear at that. The goods generally look well, but lose shape, and in a few weeks show all their defects. Seldom are such goods sold by regular clothing merchants, who have a reputation to maintain, and if they are, they are

sold without misrepresentation.

Objected to Outside Supplies. Master plumbers in Newburgh, N. J., have declared war against the mail order business as applied to their line, and have refused to handle stock bought of mail order concerns. The decision was arrived at in the case of a man who is building on Washington Heights. The plumbers said this man sought for bids for doing the plumbing and was not satisfied with the prices. He then asked how much it would cost to do the work if he would furnish the materials. The plumbers refused to consider this at

They said they are content with a reasonable profit on their supplies, but if these are not purchased from them they may as well go out of business for all the profit they make on the wages of the men alone.

The man had sent to Chicago for his materials and they had arrived here, but one after another of the plumbers refused to touch them. One reason assigned was that the western connections were such the local men were not familiar with the work.

The man was in quite a quandary for a time, because to have sent to Chicago to bring a man here, or in fact to bring anyone here from out of town would mean an expense of at least \$25, this being the sum demanded for a license to do plumbing work in Newburgh. prevall among the working classes of the large cities. Now and then some article may appear in a magazine or newspaper relating to the "sweatshop" system, but few understand what this means. It is simply this: In the garment-making line and kindred industries different articles of goods are made by contract for so-called manufacturers. The sweatshops are found in the closely crowded tenement districts, and generally are small rooms into which the workers are crowded. The different garments are cut out at another place, and are sent to be sewn together to the "sweatshops" which serve as a living place as well as a work shop. Each worker receives so much per dozen for garments sewed, and the price is barely sufficient to pay living expenses. A woman will work all day sewing shirts together, and will receive from 40 to 50 cents for her labor. Those who work on shirts confine themselves to this particular line; the ones who sew trousers, the same, and the coatmakers and vestmakers are all confined to their particular classes of work. What they receive is so scaled down as to allow the poorest kind of an existence. These shops are controlled by men who dispose of their goods to houses which compete with the regular dealers throughout the country. "Keep the price of production at the lowest," is the motto of these manufacturers, and the result is worn out and miserable women and children whose unfortunate circumstances compel them to thus labor in order to buy food.

Benevolent associations and societies for the prevention of crime have repeatedly tried to break up these horrible places, but they manage to exist in every city of any size, particularly in eastern cities. People who live in the country can assist in preventing the operations of these shops by not patronizing any concerns which make extraordinary offers in the line of clothing for men and women in catalogues and circulars sent through the mails. It is such concerns that support the sweatshop system. No reputable clothing dealer handles sweatshop goods. Se therefore the entire output of the factories go to the concerns that do a miscellaneous class of business by mall throughout the country. It is only the very cheapest kinds of clothing that come from the sweatshops, The better classes are manufactured in large and roomy factories, where there is plenty of fresh air are paid and where men and women good wages, and these are the

of goods sold by the regular trade There is danger in wearing clothing made in the sweatshops, as owing to the closely crowded rooms and general squalid conditions, germs of discase are plentiful, and it has been known that smallpox, measles, scarlet fever and other infectious diseases have been carried and spread throughout the country by clothing from these infected places.

Sales to Mail Order Houses.

Proprietors who sell mail order houses directly should, by every lawful means, be induced to discontinue marketing their goods through these avenues. If desired results can be accomplished in no other way, the proprietors should be given the alternative of choosing between the retail druggists, the logical distributers of their goods, and the demoralizers named. It is the opinion of your committee that druggists would receive far better treatment from all the proprictors if aggressive efforts were made by each druggist individually to discourage the sale of products that are overpriced, those that are not protected in any way against price demoralization, and those that are supplied by proprietors to mail order houses with full knowledge that they are to be sold to the consumer at

wholesale prices. As for the denials that are promptly fortheoming whenever this subject is broached to the proprietors that they are supplying mail order houses, the free use of electrotypes (illustrating certain lines of goods) as are constantly appearing in the catalogues of these houses, electrotypes that are identical with those the proprietors themselves are constantly using, certainly demands explanation.-Detroit Retail Druggist.

Or Finger Bowl Would Have Been Put to Novel Use.

The late William Cassidy, one-time editor of the Albany Argus, possessed the traditional Irish wit. On one occasion, a number of years ago, he was a guest at a political banquet in Albany. At that time finger bowls were seldom used, and their correct usage (a passing fad) meant to dip a corner of the napkin in the water and therewith daintily cleanse the finger tips. Most of the men present eyed the innovation, when introduced at dessert, narrowly and uncertainly. One after another ended by plunging the hand into the crystal dish. But Mr. Robert Pruyn, a well-known Albany gentleman, correctly moistened a bit of hisnapkin and laved his fingers. Mr. Cassidy watched him admiringly, not having as yet touched his own glass. "That's good," he whispered to a neighbor. "That's good. If Pruyn hadn't done that I should have put my foot in it."-Harper's Weekly.

Missed His Vocation.

Reginald de Koven, the composer, tells of a grocer and a druggist who attended a Wagner concert. As the program did not please them they began talking on music in general and on Wagner in particular. "Another example of the fact that

every man wants to do something out of his line," said the druggist. "That's all right," assented the grocer. "Now, I'm a grocer, but I've al-

ways wanted to be a banker." "You'd probably fail," added the druggist. "Look at me, I'm a success as a druggist, yet I've always wanted to write a book. This man Wagner tries his hand at music. Just listen to it. And yet we all know he builds good parlor cars!"-Success.

Not to Be Thought Of.

There was once a multi-millionaire (he was very "multi," indeed) who spent immense sums of money on his children. They had everything, including four automobiles and a steam

Still they were not satisfied. "Can you not," they implored spend a little time with us, now and then?"

His Word Not Good. John and Jim agreed to settle a difference by fighting it out. It was understood that whoever wanted to quit should cry "'nough!" John got Jim down and was hammering him soundly, when Jim cried "'nough!" But John paid no attention to his cry and kept on pounding him. Again and again Jim called out "'nough! But John paid no heed and kept busy with his fists. A boy standing near asked: 'Why don't you let the feller up?

He's yelled "'nough!" "But he's such a liar you can't believe him."

SCHOOL TEACHERS

Also Have Things to Learn.

"For many years I have used coffee and refused to be convinced of its bad effect upon the human system," writes a veteran school teacher. "Ten years ago I was obliged to give

up my much loved work in the public schools after years of continuous labor. I had developed a well defined case of chronic coffee poisoning. "The troubles were constipation, flutterings of the heart, a thumping in the top of my head and various parts of my body, twitching of my

limbs, shaking of my head, and, at times after exertion, a general "gone" feeling with a toper's desire for very strong coffee. I was a nervous wreck for years. "A short time ago friends came to visit us and they brought a package of Postum with them, and urged me to

try it. I was prejudiced because some years ago I had drunk a cup of weak, tasteless stuff called Postum which I did not like at all. "This time, however, my friend made the Postum according to directions on the package, and it won me.

Suddenly I found myself improving in a most decided fashion. "The odor of boiling coffee no longer tempts me. I am so greatly benefited by Postum that if I continue to improve as I am now, I'll begin to

CHAPTER XXV .- Continued. "You'd better not try to bring three people back through the drifts," said the doctor, who had just come in for a bite and a cup of coffee. "You can't drive two horses to advantage in this weather, and if you insist upon going why don't you take my mare and cutter and go alone? She's been in the stable all day and she knows every inch of the road, so if you just give her her head she'll bring you through all right. You'd better take my storm coat and gloves, too, for you'll find the wind pretty cold after you've been in it a bit."

Although I had but two miles or thereabouts to travel from the house to the railway station I made an early start and had the horse at the door before ten o'clock. The doctor came down to see me off and gave me a few parting words of advice.

As I opened the door it was almost blown out of my hand by the force of the wind and great sheets of snow and sleet came sailing in, under the protecochere and half way down the hall.

I bundled myself up in the doctor's reat fur coat and surrounded mywelf with his rugs and then, howing my head to the fury of the gale, I did as I had been told, and let the mare take her own gutt and pick her own way to the train.

The train was 40 minutes late and, after putting my horse in the stable and blanketing her comfortably in accordance with the doctor's instructions, I returned to the station and paced restlessly up and down the waiting room, now and then poering anxlously through the frost-coated windows in a childlike way, as if my eyes could penetrate the blackness of the night and see for miles down the track.

Finally, as the time for its arrival drew near, one of the station men, with that intuition so frequently observed and so incomprehensible to the average individual, suddenly picked up a lantern and strode out on the platform. The heavy rumble of the oncoming locomotive and the faint squeal of its whistle struck my ears at the same instant and, looking out, I saw its single bleary eye gleaming dimly in the distance as a plowed on through whirling sleet.

I was about a out on the platform myself when the station master

"I mustn't stop now, Bobbs, I have more to say and my time is growing short."

He leaned heavily against the tree for support and paused as if summoning to his aid all his energy and all his courage, and then gasped on:

"Be good to Florence when she comes to you, Ware, and-God'sbleasing-on you-both."

Suddenly, and with a muffled sob, he lunged forward and raised his poor distorted arms toward the window, which his gaze had never left for an instant. One of the nurses appeared and raised the sash to the top, letting the bitter wintry air rush in and fill the death chamber. "It's the end," mouned Carney, in a

PROUD OF HIS NEW NOSE.

Original, Frozen Off, Is Replaced by

One of Vulcanite. Philadelphia.-Greatly altered in appearance, but for the better, David Dodsen, of Barnesboro, Pa., walked out of the dental hall of the University of Pennsylvania, proud wearer of a substitute for his nose that was frozen

off in a blizzard several years ago. Last year Dodson prevailed on Dean C. H. Frazier, of the medical department, to attempt to graft a finger of his right hand on his face to form the nose. When the operation was about to prove successful, Dodson, crazed by pain, pulled the finger out of its place

and made the operation a failure. The new nose is made of flesh-colored vulcanite, with block-tin tubes, and is held on the face by means of a pair of bow spectacles and a heavy false mustache.

The case was handled by Philip Kuriz, a senior of the dental department, under the direction of Dr. A. De Witt Gritman,

INDIANA ALIENS FOR

Opinion of Attorney General Bingham May Bring Them Whenever Requests for Such Laborers Are Made.

Indianapolis.-As the result of an opinion given by James Bingham, attorney general, the bureau of immigration and naturalization at Washington, D. C., will send foreign laborers to Indiana whenever requests for such laborers are made by residents of this state. In the opinion of the attorney general, which was prepared by Edward M. White, assistant attorney general, it is held that it is not unlawful for residents of Indiana to make contracts with foreign laborers in other states or to forward money for the transportation of such laborers to Indiona. It was held that such contracts are unlawful only when they are made previous to the time the foreigner becomes a resident of the United States. For some time the department at

Washington has been divorting foreign laborers away from Indiana because there was some doubt as to the provisions of the law in this state. The division of immigration of the government bureau was established by an act of the last congress, and its purpose is to gather information and to inquire into conditions affecting immigrants in the different states with a view to a beneficial distribution of the foreign labor over the United States. Recently, T. V. Powderly, chief of the division, wrote to Charles F. Woerner, state labor commissioner, for information in regard to the laws of Indiana. Copies of certain sections of the indiana law were forwarded, and after this a letetr came from P. A. Donahue, acting chief of the division, asking that a construction be placed on the law. In answer to this request the opinion of the attorney general was forwarded.

Daniel McDonald Narrates Interesting History of the Temperance Movement

LOCAL OPTION AND COUNTY AGENCY SYSTEM

we agree with Presi lent Roosevelt Both were Tried and Found to be Unsatisfactory

Writing to the Plymouth Chron-It's up to you, says the Logans. icle Hon. Daniel McDonald recalls

My only object in writing this temperance sentiment here than there has been at any time since. On the eve of Thanksgiving, dear There was at that time, a strong organization of the Sons of Temperance, and Daughters of Temperance, all of which were secret organizations; and in addition to organization of all those in favor of temperance, which held meetings days. By 1851 they had worked up a strong anti-saloon sentiment and at the April election of that year they secured the voting on the question of "saloon" or "no saloon." The result of the election in Center township, of which Plymouth was a part, was: In favor of saloon license, 51; opposed to saloon license, 116; majority against license, So no license was issued during the following year, and Plymouth and Center township were supposed to be "dry" the following year. But it did not make much difference in the amount of liquor drank; it only did away with the licensed saloon, and changed the

places of procuring it. Over the state the local option law proved unsatisfactory, and the liquor law, and the license and local option state went into the liquor business on its own account, by establishing a dispensary in each county where all kinds of liquors were kept; county agent was put in charge of it, and he was authorized to sell it only on written prescription of a practicing physician that it was wanted for medicinal purposes. Scarcely any attention was paid to this law and there was as much drinking during its continuance as there had been before its enactment; so the legislature repealed it and went back to the license system. At every session of the legislature since then-now over fifty years, the liquor question has "bobbed up serenely" and will probably continue to do so for years to come, for the very reason

To the thoughtful, the danger of unscrupulous people killing roupy fowl and then sending the same to market with healthy stock, is not impossible. A tainted carcass will spoil, even in cold storage, which may in a measure account for the complaints often lodged against cold-storage poultry. At a sale of fancy farm stock in Massachusetta Thomas W. Lawson was one of the foreign buyers in attendance. He went in his private car, with private secretary, chef, valet, ete.; also he took up a private stock car, specially fitted up for transporting whatever choice animals he might

Mr. Lawson's coming had been well advertised, and farmers came from far and wide to have a sight of him. The fair grounds were so crowded that many men and boys were unable to gain admission, and they roosted on could peer over the high board feace THE SPIRIT at Mr. Lawson.

The financier was an active bidder. After a time a local farmer put up for sale a 2-year-old helfer. He had originally paid \$200 for the animal, but she had not turned out quite as he had anticipated, so he did not expect to realize more than that amount for her, if so much.

Some one started the bidding at \$150. Mr. Lawson promptly and loudly bld \$160. He was met with \$165, which he raised to \$175. This was agata raised, whereat Mr. Lawson seemed much annoyed. In an impressive manner he bid \$180, and looked haughtily around as if to indicate that no presuming yokel should again defy the man of wrath. However, an unabashed farmer ventured \$200, and others followed until the figure stood at \$225. Then a daring soul said \$235. There was an awful pause, while all eyes turned expeciantly toward Mr. Lawson. Rising unjestically, Mr. Lawson roared out, "Six hundred dollars!" and with an awful crash every man and boy perched on the surrounding trees fell to the ground, stunned by the power of wealth.

AND FEAST OF THANKSGIVING

Side by side with the "long, uabroken custom handed down to us by our forefathers" of setting apart annually a special day for Thanksgiving | congenial spirits. has also dwelt with us the idea that we must have as nearly as practicable the same kind of a fonst as that enjoyed by the first settlers upon these shores. From a sentimental viewpoint this theory is undoubtedly correct, and would really work out beautifully were it not for certain changed conditions affecting our supply of seasonable provisions. A regulation plan of directions for getting up a proper Thanksgiving dinner even this year would suggest the providing of oysters, turkeys, chicken for chicken pie, with vegetables, fruits, rich pastries, and delicacies in abundance. The idea is to arrange a composite meal which shall comprise as nearly as may be the various fruits and products of the earth. And a good and praiseworthy idea it is, too, if only everybody had meal. the wherewithal to purchase these fruits; but unfortunately this must be an oysterless and a turkeyless Thanksgiving for many persons. The causes contributing to this state of things cannot be discussed here; nor does it much matter to the man who en- nuts, raisins and coffee. ters a meat market and sees a turkey which he longs to purchase for his family, but which he knows he cannot and apple with cheese. Steaming hot afford, just why the commodity, with Indian pudding or plum pudding with many others, is so far beyond his means. He must follows, together with assorted nuts, to some extent give up the idea of try- raisins, dates, figs and bonbons. For ing to imitate that first Thanksgiving dinner in the forest.

In some respects the preparation of that feast, or the obtaining the articles comprised in it, must have been a comparatively simple matter. The settlers had but to take down the fowling piece, go into the woods, and bring home the wild game. Well filled oyster beds lay quite near the shore. The harvest was fruitful; grain, wild fruits, such vegetables as they knew how to raise were abundant; nuts of a feast that should fitly supplement coffee. the public Thanksgiving rendered unto the Lord? There is the point. The feast is but the outward sign or token of that which underlies the whole Thanksgiving idea. It is the feeling in the heart, the sentiment of gratitude for good received, that, after all, constitutes the real Thanksgiving. With this feeling present the absence of the turkey, even though he is everywhere acknowledged to be the king misfortune.

We are not called upon to-day to suffer the privations which were the lot of our forefathers, but any year may bring changed conditions which may necessitate more or less self-denial on our part. If the man who finds himself unable to buy material for an expensive dinner knows that his famfly circle is complete and unbroken, and everybody in health and fully able to enjoy the dinner when it is prepared, he surely has good and sufficient cause for thankfulness.

Purported Agent of Manufacturers' Association Offered Immunity and Money If He Would Betray Labor.

Norfolk, Va,-A great sensation was created in the American Federation of Labor Wednesday afternoon by President Compers in his speech replying to the attacks upon him and other officers of the federation by the Manufacturers' association, when he told of an alleged attempt to bribe him at the Victoria hotel, New York, in October by a young newspaper man giving his name as Charles Branden-

The paper, President Compers said, was to purport to have been algned when he (Gompers) was ill in 1895. This paper, Mr. Gompers said, he had preserved, and while deathlike stillness prevailed in the convention President Gompers drew forth the original document and read it. Mr. Compers during his recital of the alleged attempt at bribery called upon different delegates present, who were with him at times at interviews with Brandenburg, to verify his statements. READ THEM. The other day the writer was in the Office of the Canadian Government at St. Paul, Minnesota. On the windows of the building were signs to the effect that homesteads of 160 acres were given free to actual settlers, and in the windows were displays of wheat, oats, barley, other grains and vegetables, which he was told were grown in Western Canada. This could be readily believed for in no other country on the Continent would it be possible to grow such splendid specimens. The world is now pretty well advised that in the growing of such cereals as have been named and vegetables as well the Provinces of Manitoba, Saskatchewan and Alberta have no competitor. For several years past specimens have been exhibited at State and County Fairs throughout the State, and these exhibits are looked upon as one of the chief attractions. They have demonstrated what can be done in the climate of a country possessing a soil that will grow things. But that it was possible to grow vegetables such as were seen there seemed | say." to create some doubt. But it was course the splendid fruit grown in countries more congenial to such culture, but they were in evidence. Throughout Indiana, the hoosier farmers were forced to stop and think. When a similar exhibit was placed before them during the past few weeks, many of them were forced to stop and remark: "That is much ahead of anything we can do. The quality of the grain we have conceded, for has not so-and-so sent us samples grown on his own farm the like of which we had never seen before. But to think of the vegetables-and such vegetables. Why, we thought everything was frozen up there, and these turnips, cabbages, cauliflowers, beets, mangolds, pumpkins, and squashes are away ahead of anything we ever saw grow." During its record of more than thirty years, its long list of actual cures of those serious ills peculiar to women, entitles Lydia E. Pinkham's Vegetable Compound to the respect and confidence of every fair minded person and every thinking woman.

When women are troubled with irregular or painful functions, weakness, displacements, ulceration or inflammation, backache, flatulency, general debility, indigestion or nervous prostration, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound.

No other remedy in the country has such a record of cures of female ills, and thousands of women residing in every part of the United States bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable compound and what it has done for them.

Mrs. Pinkham invites all sick women to write her for advice. She has

guided thousands to health. For twenty-five years she has been advising sick women free of charge. She is the daughter-in-law of Lydia E. Pinkham and as her assistant for years before her decease advised under her immediate direction. Address, Lynn, Mass.

The Money Situation.

In response to 1,000 letters sent to bankers all over the Middle West by the Chicago Clearing House association the 500 replies already received are very encouraging.

It was learned that in general, the country banks are ready to cooperate with Chicago in getting to an entirely cash business basis as soon as possible. Opinions differed in various letters as to how this should be done, many institutions urging that plan now in favor in Chicago of resuming payment as fast as possible, but not necessarily everywhere at one time, would be the most satisfactory way of accomplishing the desired end.

Other bankers showed willingness to go back to a cash basis im-mediately. A majority of the mediately. A majority of the country banks, it was found, carry a large reserve and would not of necessity draw on Chicago to build up in this respect.

The U.S. treasury officials are desirous of a return to cash payments on the part of the banks at the earliest possible day as government receipts are running low because the distillers and tobacconists who are large buyers of revenue stamps are unable to make their purchases under the rule which requires the payment of cash in such transactions.

Reports from a number of large cities are to the effect that a return to cash is probable this week.

A tickling cough, from any cause, is quickly stopped by Dr. Shoop's Cough Cure. And it is so thoroughly harmless and safe, that Dr. Shoop tells mothers everywhere to give it without healtation, even to very young babies. The wholescope young leaves and tender stems of a lung-bealing mountainous shrub, farnish the curative properties of Dr. Shoop's Cough Cure. It cause the cough, and heads the sore and sensitive broachial membranes. No optum, so chieroform, nothing harsh used to injure or suppress. Simply a resinous plant extract, that height to head aching lungs. The Spaniards call this shrub which the Dr. uses. The Spaniards call this shrub which the Dr. uses. The Sacred Herb. Expires December 14

FTER Saturday, December 15, the Citizen's offer of a set of six teaspoons to the subscriber paying to January I, 1909, will be withdrawn. We know that many subscribers are intending to get a set of these spoons, but are putting it off from week to week. Our contract with the manufacturer expires on December 14; consequently no spoons after that date.

Each subscriber's account is denoted in plain figures on the colored name tag on his paper, and the amount necessary to set his subscription ahead to the required date can be figured in a moment. For instance, if the tag reads John Smith Jun07 that is the date to which his paper is now paid, and at \$1 per year, or 81 cents per month, the amount required to advance the subscription to Jan. 1, 1909, will be \$1.58, but \$1.60 should be sent.

This is the best premium ever offered by a newspaper in this section. The spoons are made by the Hamilton Silver Co., and are guaranteed to be the best substitute for solid silver ever made. They are not plated, but are solid metal and will never tarnish nor wear out.

NEW SUBSCRIBERS-Now is the time for persons not taking the Citizen to subscribe and get the premium. ARE YOU IN ARREARS? Pay up what you owe, advance your subscription to January 1, 1909, and take away a set of these beautiful spoons.

The spoons can be seen in the Citizen's window and we will take pleasure in having you call, take them in your hand and see how nice they are.
